

Deciduous Shrubs

Abelia mosanensis Hardy Abelia - Zone 5 - Full Sun-Part Shade - Korea

A medium-sized, deciduous shrub developing soft pink buds that open to showcase white flowers in early June. Each flower is sweetly fragrant with a scent that is reminiscent of Korean spice viburnum. Flowers are backed by rich green leaves that are free from disease and turn bright shades of orange and red in autumn. Plants exhibit excellent cold hardiness for the genus and have continued to impress us in our display beds. - 5-6' Tall
#2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

Abelia x grandiflora Glossy Abelia - Zone 6 - Full Sun - Garden Hybrid

An excellent small statured shrub that tops out around 4' tall in most gardens. These long valued plants offer up impeccable, deep green, high gloss leaves and prolific, 1" trumpet-shaped blossoms. Flowers are held in loose clusters and are soft pink to white in color. They are produced in great abundance and add interest to the garden from late spring into autumn. Plants are a joy to cultivate showing best performance in acidic soils with rich fertility and even moisture. - 3-6' Tall and Wide

'**Kaleidoscope**' - PP 16988 - A recent selection from Panoramic Farm, Marshville, NC, boasting bright gold-margined foliage set off by an irregular green interior. An abundance of soft pink flower buds open to white flowers in summer. - 3' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

NEW '**Rose Creek**' - A fine compact cultivar showcasing red stems, pink new growth, and white flowers backed by rose pink sepals. Despite the pink saturation, the name derives from Rose Creek in Oconee County, GA, where the plant was developed as a hybrid between *A. uniflora* and *A. chinense*. Mature foliage is pest free and high gloss with a classy deep green color. Here in zone 6 plants remain semi-evergreen in all but the harshest of winters. A bit further south there is a strong tendency for plants to remain fully evergreen. - 3' Tall, 4' Wide - #2 \$34.99 (July)

Abeliophyllum distichum White Forsythia - Zone 5 - Full Sun - Korea

A spreading shrub with an arching, irregular habit somewhat resembling the well-known forsythia. Unlike its better-known cousin with its ubiquitous yellow blooms, purple buds open instead to billows of white blossoms early in spring before leaves begin to emerge. Though plants are somewhat non-descript the rest of the year, the jubilant spring show is enough to earn them a spot in any mixed border or bed where early spring interest is sorely needed before handing the baton off to the late spring/early summer bloomers. In the garden, plants are durable performers with few pest issues and unparticular preference for soil type. Best flowering appears to develop with increasing sun exposure. - 5' Tall, 7' Wide

NEW '**Roseum**' - A pale pink flowering selection that adds a welcome bit of color to the early spring landscape. Excellent in mixed plantings as well as an option for forcing into bloom in the vase if a bit of winter color is needed to offset those winter blues. - 5' Tall, 7' Wide - #2 \$34.99 • #3 \$49.99 (July)

Aesculus parviflora Bottlebrush Buckeye - Zone 4 - Full Sun-Part Shade - Southeastern North America

An excellent, underutilized eastern US native shrub. Plants assume a multi-stemmed, suckering habit that is unique among the buckeyes. In late spring, long terminal white flower panicles appear and are set off by the bold, palmately compound foliage. The overall effect can be spectacular. In fall, the dark green leaves transform to bright yellow. Grows best in rich, well-drained soils in partial shade. - 15' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

var. serotina 'Rogers' - A selection of *Aesculus parviflora* var. *serotina* that offers amazingly long drooping flower panicles that range from 18-30" in length. Plants peak a full month after the straight species and a week or two later than is typical for variety *serotina*. Named and introduced by Dr. JC McDaniel of the University of Illinois. - 15' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

Aronia arbutifolia Red Chokeberry - Zone 4 - Full Sun-Part Shade - Eastern and Central North America

An upright, spreading, multi-stemmed shrub native to the eastern and midwestern United States. Plants display white, flat-topped flowers in early spring followed by red fruit in late summer. Transplants easily and is tolerant of many soil conditions. - 5-10' Tall

'**Brilliantissima**' - A dramatic improvement over the straight species offering glossy, dark green leaves that transform to brilliant shades of scarlet and red in fall. Plants form upright, spreading, multi-stemmed shrubs and display white, flat-topped flowers in early spring followed by glossy, bright red fruit in late summer. Transplants easily and is tolerant of many soil conditions. - 5-10' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Aronia melanocarpa Black Chokeberry - Zone 3 - Full Sun-Part Shade - Eastern North America

Black chokeberry is a worthwhile small deciduous shrub native to the eastern United States. The 1-3" long leaves are glossy dark green and transform to rich, crimson-red in fall. Abundant small white flowers appear in spring and are followed by respectable crops of large, purple-black fruits that persist for months. Plants are adaptable to many soil and light conditions and are suitable for use in many garden situations. - 4-6' Tall and Wide

'**UCONNAM165**' - Low Scape Mound® - PP 28789 - An exciting chokeberry from the breeding program of UConn's Dr. Mark Brand. The versatile, mounded shrubs showcase the adaptability expected from this genus and combine it with a compact framework. High gloss foliage remains clean through the season and provides a welcome accompaniment to spring's white flowers and late season purple-black fruit. Intense burnt orange and scarlet tones add a final dose of appeal before leaf drop. The shapely plants are well suited for integrating into a border, planting en masse and adding wildlife value to the garden. - 2' Tall, 3' Wide - #3 \$49.99 • #5 \$59.99 (July)

'**Viking**' - The leaves of this outstanding landscape shrub are larger than the species yet retain the excellent deep green color and magical scarlet autumn display. Spring's white flower clusters give way to massive crops of oversized fruit that are among the best the genus has to offer for both ornamental and edible qualities. In addition to being excellent for juice and jams, the sweet, tart fruit are reported to be enjoyable for fresh eating as well. Current research suggests that this selection may more accurately be classified under a new species, *Aronia mitschurinii*. - 3-6' Tall and Wide - #2 \$34.99 (July) • #5 \$59.99

Buddleja alternifolia Alternate Leaf Butterfly Bush - Zone 5 - Full Sun - China

Among the hardiest of the butterfly bush species, these Chinese natives boast dark green upper leaves with fuzzy white undersides, giving them a silvery-gray look and a delightful landscape texture that can be difficult to find elsewhere. From a distance, the gracefully arching branches on a fully mature shrub can nearly fool you into thinking you're looking at a weeping willow. Fragrant lilac purple flowers emerge in mid-summer on older growth. As with most butterfly bush species, full sun and evenly moist, well-drained soil is necessary for best performance and winter survival. - 8-12' Tall

'**Argentea**' - A choice shrub offering bright lilac-purple flower clusters that appear in the leaf axils of second year wood. Silvery-gray leaves provide added seasonal interest. Exhibits greater cold hardiness than most *B. davidii* cultivars and does not require annual pruning. Plants grow best in sunny, well-drained sites. Hinkley once mentioned the capacity of this species to be trained into a graceful small tree with arching symmetry, a unique idea that we adore. - 8-12' Tall - #2 \$34.99 • #3 \$49.99

Buddleja davidii Butterfly Bush - Zone 5 - Full Sun - China

An impressive, long blooming shrub worth growing for its fragrant, colorful flower display that is adored by hummingbirds and butterflies. Plants are vigorous and flower on new growth. In cooler climates they should be cut back heavily in early spring to promote better flower production. - 6-10' Tall

'**Evil Ways**' - An eye-catching butterfly bush discovered and introduced by Sean Hogan of Cistus Nursery. Plants strut flaming, bright yellow foliage that maintains its intensity throughout the growing season. Dark purple butterfly magnets begin to appear in mid to late summer and are produced deep into autumn. - 6-10' Tall - #3 \$49.99 • #5 \$59.99 (July)

'**Windy Hill**' - A fine form of butterfly bush selected for its improved cold hardiness. Has been grown successfully in sheltered locations in Zone 4/5 gardens. Fragrant, dark purple flowers. - 6-10' Tall - #3 \$49.99 • #5 \$59.99 (July)

NEW Buddleja loricata Mountain Sagewood - Zone 7 - Full Sun - South Africa, Mozambique

An uncommon South African species of butterfly bush that we're giving a trial in our northern climate. In the south, plants develop into evergreen shrubs with impressive silver cast foliage that has been a primary attraction to us. Plants reach upwards of 6-8' in height though we won't be surprised if they stay considerably smaller in our climate with potential for some dieback. The rounded plants produce masses of fragrant white flowers in summer that are said to resemble popcorn. Plants show preference for sunny, sheltered positions with free draining soils. No doubt they could make an interesting candidate for a large planter as well. Though plants show few pest issues we do anticipate that cold tolerance could be a limiting factor in our climate, time will tell. We have a few plants to share this year for those adventurous gardeners seeking something a bit different. - 5-7' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Buddleja nivea var. yunnanensis Snow White Butterfly Bush - Zone 6 - Full Sun - Western China

A very rare Chinese native forming sizeable specimens to 10-15'. The amazing, 6-12", elongated leaves are covered with dense, silver-gray fuzz adding visual impact and strong texture to the garden. In summer, terminal panicles of lavender-mauve flowers are produced in succession into early autumn. Plants are easy to cultivate if given average garden soil in ample sun exposure. We grow it next to the sexy burgundy foliage of Cotinus x 'Grace' and find the contrast breathtaking! - 10-15' Tall - #3 \$49.99 • #5 \$59.99 (July)

Buddleja x 'Honeycomb' Honeycomb Butterfly Bush - Zone 6 - Full Sun - Garden Hybrid

A reasonably long cultivated hybrid buddleja that has eluded our propagation list for far too long. The strong growing plants flirt with summer's sun with golden-yellow flowers that add a pleasant diversity to the color wheel of this genus. Silvery-green foliage complements the upright-arching framework and cheery flowers which often begin their show in early summer and continue through first frost. - 5-8' Tall - #3 \$49.99 • #5 \$59.99 (July)

Buddleja x 'Silver Anniversary' Silver Anniversary Butterfly Bush - Zone 6 - Full Sun - Garden Hybrid

From England's Peter Moore comes this distinctive and very fine butterfly bush developing an upright-arching framework of graceful stems. The lance-shaped leaves are generously coated with short gray hairs giving the plants a dramatic shimmering presence in the garden. Fragrant, honey-scented white flowers are held in dense clusters and appear in late summer at the tips of the branches. Plants are excellent for use as contrast elements in the sun garden. - 5-7' Tall #2 \$34.99 (July) • #3 \$49.99 (July)

Callicarpa bodinieri var. giraldii Bodinier Beautyberry - Zone 6 - Full Sun-Part Shade - Central China

Long considered one of the finest species for garden use this desirable shrub is amongst the best for late season appeal. In summer, 2" clusters of lavender-purple blossoms emerge from the base of the deep green leaves. By autumn, crops of deep purple fruit dangle from the 8-12' scaffolding stealing the show. Plants are pest and disease free giving excellent results in rich soils. - 5-8' Tall

'Profusion' - A vigorous, upright-arching shrub growing to a height of 5-8' with a similar spread. The deep green, oval leaves emerge flushed with attractive bronze-purple tones and pick up two-toned golden-yellow autumn hues. At their best in late August when a stunning display of purple berries develop and remain attractive past leaf drop and into December. - 5-8' Tall - #3 \$49.99 • #5 \$59.99 (July)

Callicarpa dichotoma Beautyberry - Zone 5 - Full Sun-Part Shade - Eastern and Central China, Japan

A graceful, arching, small shrub native to China and Japan. The primary ornamental feature is the spectacular display of lilac-violet fruit in fall. Few plants can compete with the beautyberries at this time of the year. - 5-6' Tall

'Early Amethyst' - A wonderful form of purple beautyberry that produces copious crops of dazzling, violet berries on a gracefully arching shrub. - 5-6' Tall - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'Splashy' - An eye-catching shrub with dramatic, white-splashed and streaked foliage. Looks amazing in fall when the foliage contrasts dramatically with the metallic-purple berries. Quite rare and choice! - 4-6' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • #7 \$79.99

var. albafructus 'Duet' - A dazzling selection from the US National Arboretum that was discovered as a chance sport on a specimen of *C. dichotoma* var. *albafructus*. Plants are truly beautiful flaunting bold, cream-edged foliage all season long. In fall, this display is coupled with a respectable show of unique, white berries. - 5-6' Tall - #2 \$34.99 • #3 \$49.99 (July) • #5 \$59.99 • #7 \$79.99 (July)

Callicarpa japonica Japanese Beautyberry - Zone 6 - Full Sun-Part Shade - Japan

A medium-sized deciduous shrub native to Japan. Plants develop clusters of pink, sweetly fragrant flowers in July that are often obscured by the 2-3" leaves. The flowers often elicit a "what's that smell" reaction from customers who sense the fragrance but can't see the blooms amongst the plant's greenery. In fall, the plants shine when they develop a dazzling showcase of long-lived, purple berries. The beauty is difficult to describe but is certainly among the finest of all autumn displays. Plants are slightly larger growers than *C. dichotoma* types and have a slightly coarser texture. - 5-6' Tall

'Leucocarpa' - A fine selection of Japanese beautyberry offering clean white fruit to bulk up your winter display. The distinctive fruit is certain to draw attention when present and on display in autumn. Remaining plant qualities are comparable to the straight species. - 5-6' Tall #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

Calycanthus chinensis Chinese Wax Shrub - Zone 6 - Part Shade-Shade - Eastern China

An alluring Chinese species closely allied to the US native, *C. floridus*. The species was formerly classified in the genus *Sinocalycanthus* but was recently re-named. This vigorous shrub grows 6-10' tall with bold, medium green leaves that turn bright yellow in fall. In June, delicate, rounded buds unfold to display sumptuous, 3", pink-blushed white flowers accentuated by a ring of yellow stamens. Plants are easily grown in average garden soil in dappled shade. Blends nicely into the shrub border or woodland garden. - 6-10' Tall - #2 \$34.99 (July) • #3 \$49.99 • #5 \$69.99 (July)

Calycanthus floridus Sweetshrub - Zone 5 - Full Sun-Shade - Southeastern North America

An interesting and underutilized shrub native to the southeastern United States. Plants develop 2", fragrant, maroon flowers in May and sporadically in summer. Exceptional variability is present in seedling populations. - 6-8' Tall

'Athens' - An attractive form offering medium green foliage and unique, greenish-yellow flowers that emit a fruity fragrance. Distinct among sweetshrub cultivars. - 6-8' Tall - #2 \$34.99 • #3 \$49.99 (July) • #5 \$69.99 • Assorted Specimens Individually Priced

'Michael Lindsay' - A choice selection of our native sweetshrub! Offers beautiful, dark, lustrous green foliage that turns to soft butter yellow in fall. Abundant dark maroon flowers emit a wonderful strawberry-like fragrance. Plants are difficult to propagate and rarely offered. - 6-8' Tall #2 \$34.99 • #3 \$49.99 (July)

'Burgundy Spice' - PP 28886 - *Calycanthus* 'Burgundy Spice' is a refreshing change of pace for one of our favorite underutilized garden shrubs. As the name suggests, the lush leaves of this exciting selection are rich burgundy in color and high gloss, remaining luxuriant all season long. Classic maroon flowers emerge in mid spring along the stems. Selected and introduced by our friends at Pleasant Run Nursery in New Jersey. - 6-8' Tall - #3 \$59.99 • #5 \$89.99 (July)

Calycanthus x raulstonii Hybrid Sweetshrub - Zone 5 - Full Sun-Shade - Garden Hybrid

An exciting group of hybrids that are the result of crosses between *Calycanthus chinensis*, *C. floridus* and the western US native, *C. occidentalis*. The first selection of the group, 'Hartlage Wine' was bred and introduced by the talented scientists of North Carolina State University. - 8-12' Tall and Wide

'Dark Secret' - A 2018 Broken Arrow Nursery introduction that is the result of a hybrid involving the same parentage as the classic selection 'Hartlage Wine'. Overall plants are strong growing and create a breathtaking display in the garden. In late spring and early summer, spectacular rich maroon blossoms engulf the plants adding an incredible visual display. Each 3" blossom offers abundant, prominently pointed tepals and petals. The outer structures are rich burgundy-red in color and contrast starkly with near white inner petals. The overall impact creates a feel that is several shades darker than 'Hartlage Wine'. When not in bloom the bold textured leaves add appeal. Each leaf is bright green in color and can reach 8-10" in diameter on vigorous shoots. - 8-12' Tall and Wide - #2 \$34.99 (July) • Assorted Specimens Individually Priced

'Hartlage Wine' - A fine introduction from the JC Raulston Arboretum that resulted from a cross between our native sweetshrub (*Calycanthus floridus*) and its Chinese counterpart, Chinese wax shrub (*Calycanthus chinensis*). These heart-stoppers display numerous, 3", dark red, magnolia-like flowers in May and sporadically throughout the summer months. Flowers are set off by the attractive, dark green, disease-free foliage. Plants are exceptionally vigorous and perform best in rich, well-drained soil in part shade. - 8-12' Tall and Wide - **Assorted Specimens Individually Priced**

'Venus' - A complex hybrid sweetshrub that produces large, magnolia-like, white flowers accentuated with yellow and purple markings in the center. Flowers are reported to have a delicate fragrance with an aroma reminiscent of strawberries and melons. Bloom time occurs primarily in spring with a spattering of additional flowers throughout the growing season. Sure to become a garden treasure. Get yours early as supply won't meet demand! - 6-8' Tall and Wide - #2 \$34.99 (July) • **Assorted Specimens Individually Priced**

Caryopteris x clandonensis Blue Mist Shrub - Zone 5 - Full Sun - Garden Hybrid

A low mounding shrub with soft blue flowers that appear in the late summer months. An excellent, deer resistant landscape plant for the dog days of summer. Plants benefit from some pruning or sheering in spring prior to leaf emergence. - 4' Tall and Wide

'Longwood Blue' - A classic selection from Longwood Gardens best known for its stylish, violet-blue flowers set off by impeccable silver cast foliage. An excellent candidate for the sun-drenched mixed border and for adding late season interest to the garden. - 4' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'Minigold' - PP 33874 - An undersized plant with oversized impact! Low mounds of gleaming golden foliage are topped in late summer with clouds of deep blue flowers humming with pollinators. - 2-3' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

'Summer Sorbet' - A refreshing visual treat in the garden all growing season with stunning, golden gilded leaves paired with icy blue flowers that emerge as the deepest heat of summer sets in. The tidy, well behaved plants show good resistance to deer browse and are excellent for attracting butterflies and hummingbirds. - 4' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'White Surprise' - PP 21146 - A fine recent selection discovered as a chance sport of the classic mist shrub 'Heavenly Blue'. The rounded shrubs draw season long attention with bold white-edged foliage that is both stable and sun tolerant. In late summer, plants come into their own with a picturesque showcase of abundant pale blue flowers. - 4' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Ceanothus americanus New Jersey Tea - Zone 4 - Full Sun - Eastern and Central North America

A tough, adaptable, small-stature shrub developing clusters of creamy-white flowers in summer. Plants assume a broad-mounded form with medium to rich green foliage. Plants are deserving of greater landscape consideration and are especially valuable for infertile, dry soils. - 3' Tall and Wide #1 \$24.99 • #2 \$34.99 (July)

Cephalanthus occidentalis Buttonbush - Zone 4 - Full Sun-Part Shade - North America

An underutilized native shrub with a mind boggling range that extends from New Brunswick to Florida and west to central California and Mexico. Plants assume a rounded habit and are graced with unique, spherical clusters of creamy white flowers in mid-summer. The species is best suited to moist soils and is tolerant of sopping wet sites and seasonally standing water. - 5-10' Tall and Wide

'Sputnik' - Abundant, rounded, creamy-white blossoms are prominently displayed on this butterfly and pollinator magnet. Plants tend toward the compact size of the spectrum and display the superb adaptability for which the species is becoming known. Selected from a wild population in Oklahoma. - 5-6' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July) • **Assorted Specimens Individually Priced**

Chaenomeles speciosa Flowering Quince - Zone 5 - Full Sun - China, Tibet, Myanmar

A long cultivated shrub species best known for its prolific, early spring flowers that serve to enliven gardens throughout April and May. Plants are a pleasure to grow in sunny open exposures as they combine superior heat and drought tolerance with excellent deer resistance. The straight species develops into a sizeable, irregularly branched specimen with an overall rounded form. Ultimate size may approach 10' high and wide though many of the newer selections are more compact. An excellent plant for integrating into a mixed border or for use in hedges or mass plantings. - 6-10' Tall and Wide

'Scarlet Storm' - PP 20951 - Yet another improved flowering quince selection that has served to redefine this classic flowering shrub. 'Scarlet Storm' showcases massive deep scarlet-red, semi-double blossoms in early spring. Each blossom can be as much as 2" in diameter and is held on a compact framework. Excellent for use in a mixed planting and also works wonderfully as a cut stem. - 5-6' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Chionanthus virginicus White Fringetree - Zone 4 - Full Sun-Part Shade - Eastern and Central North America

An exceptional large specimen shrub that develops abundant 6-8" soft-textured, airy white flowers in May followed by abundant, blue-black, grape-sized fruit on female plants. Plants grow best in rich, acidic soil but are adaptable to other conditions. - 10-20' Tall and Wide - **Assorted Specimens Individually Priced**

'Emerald Knight' - A choice male selection introduced by Brian Upchurch of Highland Creek Nursery in North Carolina. Plants have handsome, lustrous, dark green foliage and an abundance of fleecy white flowers that hang from the branches like a late spring snowfall. Plants have been tough to propagate so are rarely available. - 10-20' Tall and Wide - **Assorted Specimens Individually Priced**

NEW 'Little Leslie' - We've longed for a compact selection of this fine eastern US native for a long time, and it appears that our prayers have been answered with this prized compact clone! Though small in stature, 'Little Leslie' packs a punch with large quantities of familiar fringed blossoms in spring followed by crops of blue, singled seeded fruit in fall. We love the door this selection opens by expanding the opportunity to garden with this species in tighter garden positions! - 5-7' Tall and Wide - #2 \$49.99 • #3 \$69.99

'Spring Fleecing' - A heavy blooming male selection of white fringetree that impresses with feathery blooms that convey the look and color of the whiskers on Santa's chin. The plants are upright and reliable giving a consistent display year in and out. A standout on its own right but also a suitable pollinator if fruit is desired on female plants. - 10-20' Tall and Wide - **Assorted Specimens Individually Priced**

'White Knight' - From respected nurseryman Alan Jones comes this tremendous male fringetree selection. 'White Knight' commands attention in late May with its reliable abundance of feathery, white flower panicles that are produced on plants from a young age. Impressive lustrous, leathery leaves stand up to the rigors of the growing season before transitioning to clear yellow tones in kind autumn weather. Outstanding through the year, plants are sure to impress when grown en masse or as a stand-alone specimen. - 10-20' Tall and Wide - **Assorted Specimens Individually Priced**

Clerodendrum trichotomum Glory Bower - Zone 6 - Full Sun-Part Shade - Eastern China, Japan

A large, slowly suckering, deer resistant shrub maturing 12-15' in height. Sweetly fragrant white flowers smother the plant from July through the end of August. Flowers are followed by striking, metallic blue, pea-sized fruit each surrounded by a bright red, 5-lobed calyx. The display is exhaustingly beautiful at its peak. Plants are durable and are best used when blended into the shrub border. - 12-15' Tall and Wide

'Carnival' - Oh how cool is this! Imagine combining the magnificent qualities of the traditional glory bower with outrageous cream and white-edged leaves. The result is 'Carnival', a swanky, high-glitzy variant of this underutilized species. Foliage is sun tolerant showing impeccable color all growing season. - 8-12' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Purple Blaze' - A stunning fast-growing shrub that boasts deep purple blushed new growth and masses of heavenly scented white flowers in summer. In fall the flowers are replaced by jewel-like glossy-blue fruit backed by equally attractive red calyces. - 8-12' Tall - #2 \$34.99 (July) • #3 \$49.99 (July)

Clethra acuminata Cinnamon Clethra - Zone 5 - Full Sun-Part Shade - Southeastern North America

An underutilized medium-sized shrub native to rocky, mountainous sites in the southeastern United States. The 3-8" drooping racemes of fragrant, white flowers appear in July and August creating a wonderful effect in the garden. Plants are also pleasing in winter with their striking, exfoliating, cinnamon-red bark. Our specimen has grown without complaint for numerous years on a dry slope in the shadows of a native red oak where summer's flowers have partnered beautifully with a mature *Acer palmatum* 'Ever Red'. - 8-12' Tall - #2 \$39.99 • #3 \$59.99 (July)

Clethra alnifolia Summersweet Clethra - Zone 4 - Full Sun-Shade - Eastern North America

An easy to grow native shrub that should find a home in everyone's garden. Provides a wonderful display of fragrant white flowers in July and August followed by butter-yellow fall color. Plants grow great in nearly any garden site including wet shade and salty soils along the shore. Even better, they show good resistance to deer browse. In recent years the market has exploded with new forms and we are happy to offer some of the best. - 5-8' Tall

'Anne Bidwell' - An impressive upright clethra with huge, 8-10" branched inflorescences. Blooms up to two weeks later than other selections. - 5-8' Tall - #2 \$34.99 (July) • #3 \$49.99 (July) • #5 \$59.99 (July)

'Firefly' - A unique, compact clone of clethra that develops a rounded habit to 3'. The dense plants showcase vibrant yellow foliage in full sun exposure coupled with familiar white flowers in summer. An exciting option that was developed by the US National Arboretum. - 2-3' Tall - #2 \$39.99

'Goldsprenkle' - An intriguing and distinct selection of summersweet clethra recently discovered as a chance seedling by good friend Ron Rabideau. Plants showcase cleverly variegated leaves that are irregularly and delicately painted and flecked with gold almost as if Jackson Pollock had touched up the leaves with his unique style of drip painting. Sufficient green remains in the leaves to provide the perfect foil for summer's highly fragrant flower spikes. Notably different than other clethra yet worthy of a prime location in the garden. - 5-6' Tall - #2 \$34.99 • #3 \$49.99 (July) • #7 \$99.99

'Ruby Spice' - A rich pink flowered form that was discovered and introduced by Broken Arrow Nursery. Flowers are the darkest pink to date and hold their color well in the heat of summer. Honored with many horticultural awards including the Cary Award and the Pennsylvania Horticultural Society Gold Medal. - 5-8' Tall - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'Sherry Sue' - An intriguing form of summersweet clethra that has been making the rounds of late. New growth offers unique, pinkish-red stem coloration which is maintained throughout the growing season. Classic, intoxicatingly fragrant white flowers and late summer appeal. - 5-6' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Sixteen Candles' - One of the best introductions to hit the market. Selected and promoted as an improved 'Hummingbird' by Dr. Michael Dirr. Plants exhibit a superior habit and large spikes of white flowers. - 3-4' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Clethra alnifolia var. tomentosa Woolly Summersweet Clethra - Zone 5 - Full Sun-Shade - Eastern North America

An attractive and underutilized variety of summersweet that offers handsome silvery, pubescent leaves and stems. A premium of creamy white flowers appear several weeks after most C. alnifolia types. Unfortunately, this gem is often overlooked. - 5-6' Tall - #2 \$34.99 (July)

'Woodlanders Sarah' - An attractive new selection of summersweet clethra with leaves that are heavily speckled and splashed with cream and white. Plants are good performers showing more cream in the foliage than the variegated selection, 'Creel's Calico'. - 5-6' Tall - #2 \$34.99 • #3 \$49.99 (July)

Clethra barbinervis Japanese Clethra - Zone 5 - Full Sun-Shade - Japan, South Korea

A choice Japanese species of clethra that deserves much greater attention in the garden. Displays delightfully fragrant, white flowers in July and August followed by respectable red to yellow fall color. The bark is likely the most beautiful characteristic of the plant and reminds one of *Stewartia pseudocamellia*. Plants can be trained as trees or shrubs and perform best when given rich soil and ample moisture. - 15-20' Tall

#2 \$39.99 • #3 \$59.99 • #5 \$79.99 (July) • Assorted Specimens Individually Priced

'Takeda Nishiki' - A fine variant of this exquisite Japanese species with leaves that are boldly splashed with pinkish-white variegation. Initially discovered by Mr. Takeda and his son on Shikoku Island, Japan. - 6' Tall - #2 \$44.99 (July) • #3 \$69.99 (July)

Comptonia peregrina Sweet Fern - Zone 2 - Full Sun - Eastern North America

An attractive, underutilized native species with rich green, pleasantly scented, fern-like foliage and a low growing, suckering nature. Plants are tough as nails preferring sandy, dry, infertile sites over typical manicured garden soils. A great choice for that spot where everything else dies! - 3' Tall, 8' Wide

#1 \$24.99 • #2 \$39.99 • #3 \$49.99 (July)

Cornus alba Tatarian Dogwood - Zone 3 - Full Sun-Part Shade - Siberia, Manchuria, North Korea

A versatile, multi-stemmed shrub dogwood that blends easily into many landscape settings. Plants are tough as nails and make great companion plants in many growing conditions. - 6-10' Tall and Wide

'Bailhalo' - An improved form of 'Elegantissima' selected by Bailey Nursery. Plants are more compact, exhibit darker red winter stems and have better leaf spot resistance. - 4-6' Tall - #2 \$34.99 • #3 \$49.99 (July)

'Elegantissima' - An old standby selection with green foliage broadly edged with a showy white margin. Bright red winter stem coloration that adds a much needed spot of color during the dormant months. - 6-8' Tall - #2 \$34.99 • #3 \$49.99 (July)

'Fire and Ice' - A 2018 Broken Arrow Nursery introduction that was discovered as a chance branch mutation on a landscape specimen of *Cornus alba* 'Cardinal'. 'Fire and Ice' emerges in spring with near white new growth. As the season develops, green pigment gradually accumulates in the leaves leading to a slow transition to fresh green by mid-summer. In autumn, vibrant orange-red fall colors add additional visual appeal before dormancy sets in. During winter, vibrant orange-scarlet stems dominate the landscape. Plants are strong growing, developing a multi-stemmed framework to 8' in height. Excellent in full sun conditions with average to moist soil conditions. - 6-8' Tall - #2 \$34.99 • #3 \$49.99 (July) • #5 \$59.99 (July)

'Sunshine' - A choice treasure that displays dazzling yellow foliage in spring and summer accompanied by brilliant red stems in winter. Excellent for contrast in the garden, especially when sited in sun. - 6-8' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

NEW **Cornus quinquenervis** Alder Wood - Zone 6 - Full Sun-Part Shade - China

An interesting and unjustly rare addition to our collection of shrub dogwoods that hails from the forested hills and stream banks of China. Familiar white flowers are held in a lace-cap arrangement along arching red blushed stems in mid-summer. The distinctive lance shaped leaves are prominently veined, glossy and more reminiscent of some members of the genus *Ilex* than *Cornus*! In the garden, plants have an overall refined air lending themselves nicely to a broad set of applications. Plants are tolerant to a broad diversity of soil and light conditions with few known pest issues documented to date. - 6-8' Tall and Wide

#2 \$34.99 • #3 \$49.99 (July)

Cornus sanguinea Bloodtwig Dogwood - Zone 3 - Full Sun - Northern Europe, Northern Asia

A bulky, 8-12' shrub with abundant, white, flat-topped flowers in May and early June followed by crops of purple-black fruit in fall. Plants are good performers and are adaptable to all but the poorest soil conditions. The species is rarely cultivated, however several excellent cultivars are available. - 8-12' Tall

'Compressa' - A distinctive and elusive semi-dwarf selection of bloodstem dogwood that always demands attention. The slow growers flaunt thick, puckered, army green leaves that pack themselves tightly along the narrow, upright branching. In autumn the leaves transition to pleasant purple and bronze tones. An excellent choice for the rock garden or other prominent location where vertical accent is required. - 6-8' Tall, 3' Wide

#2 \$39.99 • #3 \$59.99 (July) • #5 \$79.99 • #7 \$99.99 (July) • Assorted Specimens Individually Priced

'Midwinter Fire' - A moderate-sized deciduous shrub prized for its bright yellow, orange and red stem coloration. Creates a wonderful effect in the winter garden when set off by fresh snowfall. Plants are easy to grow and work well in the shrub border, en masse or as a screen. - 6-10' Tall and Wide

#2 \$34.99 • #3 \$49.99 (July)

Cornus sericea Red Osier Dogwood - Zone 2 - Full Sun-Part Shade - North America

A short, wide-spreading shrub dogwood closely allied with *C. alba* and *C. amomum*. Plants develop a suckering, multi-stem habit and are valued for winter interest when their colorful twigs are at their best. Flat, creamy-white flower clusters appear in spring adding seasonal interest. Plants are top performers tolerating dry and wet sites in an assortment of light levels with ease. Makes an excellent filler plant and is also a suitable choice for mass planting. - 6-10' Tall and Wide

'Baileyi' - An older cultivar that is similar in look to the species with attractive dark green leaves that transition to rich, red-purple in fall. Prominent red winter twigs are equally eye-catching in late fall and winter. - 6-8' Tall - #3 \$49.99 • #5 \$59.99 (July)

'Hedgerows Gold' - An excellent selection with dark green foliage punctuated with a dramatic bright gold margin. Prominent red twigs provide a superb winter display. Best foliage coloration occurs in full sun with a fair amount of air circulation. - 6-8' Tall - #2 \$34.99 (July) • #3 \$49.99 (July)
'Silver and Gold' - A short, wide-spreading form that originated as a branch sport on the selection 'Flaviramea'. Offers fantastic, white-edged leaves throughout the growing season and cheery yellow twigs in winter. Plants are especially attractive when backed by evergreens. - 5-7' Tall #2 \$34.99 (July) • #3 \$49.99 (July)

Corylopsis glabrescens Fragrant Winterhazel - Zone 5 - Part Shade - Japan

A wide spreading, moderate to large deciduous shrub. Bears abundant, pendulous racemes of 1-2" fragrant, primrose-yellow flowers in April before the leaves emerge. Attractive, blue-green, rounded leaves are present throughout the growing season. Plants are as beautiful as any plant in the garden when in full bloom. - 8' Tall, 12' Wide

'Longwood Chimes' - An outstanding selection of fragrant winterhazel introduced by Pennsylvania's famed Longwood Gardens. 'Longwood Chimes' puts forth an amazing display of bright-green hued, yellow blossoms in early spring. Each flower emits an intoxicating sweet perfume that can be enjoyed from some distance. Plants assume a wide spreading habit typical of the species yet show improved frost tolerance as the blossoms develop up to two weeks later than most other Corylopsis. - 8' Tall, 12' Wide - #2 \$39.99 • #3 \$59.99 • #5 \$79.99 (July)

Corylopsis pauciflora Buttercup Winterhazel - Zone 6 - Part Shade - Japan, Taiwan

A highly regarded dense, spreading shrub that is most valued for its copious fragrant yellow flowers that dangle from the branches in early spring prior to leaf emergence. Plants perform best in part shade in soil that is evenly moist throughout the growing season. - 6' Tall, 8' Wide - #2 \$39.99 • #3 \$59.99

Corylopsis spicata Spike Winterhazel - Zone 5 - Part Shade - Japan

A breathtaking species of winterhazel native to wooded regions in Japan. Clear-yellow, fragrant flower racemes drip from the zigzag branches in spring prior to leaf emergence. Soon after flowering, purple tinged foliage emerges and ages to deep blue-green. Overall an excellent multipurpose shrub for use in many areas. - 8' Tall, 12' Wide - #2 \$39.99 • #3 \$59.99 (July)

'Gold Spring' - A welcome addition to the range of winterhazels available for garden use. 'Gold Spring' showcases bronze-brushed new growth that quickly transforms to startling shades of yellow and gold. This amazing display remains attractive throughout the growing season and adds a whole new appeal to this fantastic group of plants. - 6' Tall, 8' Wide - #2 \$39.99 • #3 \$59.99 (July)

Cotinus coggygria Smokebush - Zone 3 - Full Sun - Southern Europe, Central China

A large rounded shrub grown primarily for its impressive "smoke-like" floral effect and brilliant crimson, yellow and purple autumn color. Plants are tough as nails preferring full sun and adapting well to all but wet growing conditions. - 10-15' Tall and Wide

'Ancot' - An exciting recent smokebush introduction with gorgeous, golden-yellow leaves, turning scarlet, orange and red in autumn. Typical smoke-like floral effect in July and August. Best foliage coloration occurs in full sun. - 8-12' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • #7 \$79.99

'Royal Purple' - A top performer offering vibrant burgundy-purple foliage followed by exquisite crimson-red fall color. Makes a breathtaking statement when combined with chartreuse or gold in the garden. - 8-12' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Cotinus x 'Grace' Grace Hybrid Smokebush - Zone 3 - Full Sun - Garden Hybrid

A rapid growing hybrid between Cotinus obovatus and C. coggygria. This eye-catching selection offers deep, burgundy-purple new growth and brilliant, scarlet-red fall color. Makes a dramatic cutback shrub. - 10-15' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Cotoneaster bullatus var. floribunda Hollyberry Cotoneaster - Zone 4 - Full Sun - China

Cotoneaster has historically been one of those plants one simply walks by in collections and generally writes off as "twiggy debris trap" and "pest and disease magnets". That is until we stumbled upon this magnificent plant in the Montreal Botanic Gardens which changed our perception of some members of this group. Cotoneaster bullatus var. floribunda is a large shrub reaching 12' tall when mature. The arching branches are quite graceful and cloak themselves with extremely glossy oval leaves prominently presented with corrugated impressed veins. In the spring garden the branches drip with masses of loose, pale pink and white flowers which transition to crops of scarlet-red fruit that persist into autumn. The fruit display is notable as the display is not unlike our native winterberry holly (Ilex verticillata) and is a nice complement to the fall color which is also magnificent shades of scarlet and orange. Plants are easy to grow in sun-drenched average garden soils and have shown few pest or disease issues in our collections over the past 10 years. We love it and hope you'll give it a try! - 8-12' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

NEW Cotoneaster franchetii Gray Cotoneaster - Zone 5 - Full Sun - China, Thailand

Definitely one of those eye catching "what is that??" plants in our landscape! This non-cotoneaster looking plant develops a graceful waterfall habit that brings an elegant texture to the garden all year round. Masses of small pale pink flowers bring spring interest when set against the high gloss, deep green leaves. The arching framework is the perfect foil for crops of brilliant red fruit and vibrant scarlet-purple foliar tones that command attention throughout autumn. Plants have been carefree performers in our trials showing pest resistance and strong growth when sited in a sunny position with average soil structure. - 8-12' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

NEW Cotoneaster glaucophyllus Bright Bead Cotoneaster - Zone 6b - Full Sun - China

Throughout the growing season, soft white fuzz covers the gray-green leaves giving the impression that hoarfrost has settled in the garden year-round. The fall chill brings along vibrant red leaves and fruit, which last for quite some time provided the birds don't strip them bare. Plants are tardily deciduous to ever-green depending on the hardiness zone and work best when positioned to contrast against dark leaved plants for the most eye-catching appeal. Plants tolerate varied soil conditions, a trait shared with most members of the genus. Best ornamental presentation tends to occur in sun-drenched garden positions. - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Cotoneaster horizontalis Rockspray Cotoneaster - Zone 5 - Full Sun - Western China

A semi-evergreen to deciduous spreading shrub long valued for its horizontal branch structure and symmetrical twig alignment. The small, rounded leaves are accentuated by masses of pinkish-white flowers in late spring followed by pea-sized scarlet fruit in fall. - 2' Tall, 5' Wide

'Cheney' - Spring brings a flush of diminutive white and pink variegated leaves that mature to green with stark white edging! In concert with this foliar development comes a display of pinkish white flowers and red fruit. Purple-red fall color provides additional seasonal flair and sculptural, herringbone patterned branching adds valuable structure to the winter landscape. - 2' Tall, 5' Wide - #2 \$34.99 (July)

Cotoneaster x suecicus Hardy Swedish Cotoneaster - Zone 6 - Full Sun - Garden Hybrid

Cotoneaster x suecicus is an interspecific hybrid between C. dammeri and C. conspicuus. The shrubs often assume a low, spreading framework and can be utilized as a groundcover in some landscape applications. The small, simple leaves are rich green in color during the growing season and can remain ever-green in especially mild winters in our climate. In harsh winters the leaves will go deciduous. From dainty white flowers in spring develop a prolific crop of scarlet-red fruit in fall which add a beautiful contrast to the greenery. Plants are durable in the garden performing admirably in a diversity of soil types with drainage. - 2' Tall, 6' Wide

'Emerald Sprite' - PP 31719 - A fire blight resistant selection of this dwarf cotoneaster that has been valued for its compact, mounded framework and dense branching. The diminutive plants boast pure white starry flowers in spring and orange fruit in fall that contrast nicely against the clean, high gloss leaves. An excellent option for adding to the rock garden, sloping border or other tight garden space. - 1' Tall, 3' Wide - #2 \$34.99 • #3 \$49.99 (July)

Deutzia gracilis Slender Deutzia - Zone 4 - Full Sun - Japan

A durable, broad mounding, deciduous shrub with graceful, arching branches. Plants are covered with countless pure white flowers in spring. A wonderful plant when in full bloom and a versatile addition to the garden. - 3-4' Tall and Wide

'**Nikko**' - A compact and refined selection with improved burgundy-red fall color. The arching stems take root creating a spreading, groundcover-like quality. Plants are versatile and highly popular! - 2' Tall, 4' Wide - #2 \$34.99 • #3 \$44.99 (July)

'**Nikko Dawn**' - A fine variegated selection of the classic 'Nikko' once offered through plant collector Barry Yinger's nursery Asiatica. The low, spreading plants offer leaves with crisp, cream-white variegated margins to complement spring's striking show of white blossoms. The durable plants are easily cultivated and at home in many landscape situations. Sadly, this fine plant has been lost in the madness of high-end marketing and convoluted naming associated with similar selections. That's OK, we're happy to bring it back to market and promote its virtues. - 2' Tall, 5' Wide. - #2 \$34.99 • #3 \$44.99 (July)

Deutzia scabra Fuzzy Deutzia - Zone 5 - Full Sun - Japan

An irregular shrub forming a 6-10' arching framework of coarse stems and greenery. The opposite leaves are medium green and pubescent lending a rough texture reminiscent of fine grade sandpaper. Masses of 1/2" clean-white blossoms appear in late May or early June and can be relied upon to steal the show year in and out. Plants are durable showing tolerance to a range of soil conditions and strong resistance to pest and disease challenges. - 6-10' Tall and Wide

'**White Splash**' - A medium-sized, graceful, arching shrub with branches that support 2" leaves that are heavily splashed and streaked with bold white variegation. Clear white flowers are borne in 3-6" panicles making themselves known in late May or early June. - 6-8' Tall and Wide - #2 \$34.99 • #3 \$44.99 (July)

Deutzia setchuensis var. corymbiflora Chinese Snow Flower Deutzia - Zone 6 - Full Sun - China

A terrific plant that we've admired for several years and are delighted to have back in stock again. In June, plants provide an arresting display of white, star-like flowers held along the elegant, arching branches. Flowers are the perfect complement to the small, grayish-green leaves that turn burgundy-red in fall. Plants reach 4-6' in height and blend well into the border. - 4-6' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Deutzia x hybrida Hybrid Deutzia - Zone 5 - Full Sun - Garden Hybrid

A complex collection of shrubs largely hybridized from *Deutzia longifolia* and *D. discolor* though other parentage is occasionally mixed in as well. This group tends to mature between 6-8' tall with upright, rounded habits comprised of arching, twiggy stems. Dense and bushy, these shrubs are covered with flowers in spring in a range of colors including pinks and whites. Many cultivars offer interesting foliage colors and textures to complement the flowers. The plants are solid garden performers for quick growth and instant wow. - 8' Tall and Wide

'**Magician**' - A tough, moderate-sized, deciduous shrub laden with abundant pink and white striped flowers in spring. Plants develop an arching habit and are at home in the sun-drenched shrub border or mixed planting. Another great, underused plant from this classic, underappreciated genus. - 8' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'**Nikko Blush**' - From the US National Arboretum comes 'Nikko Blush', the result of a controlled cross made back in 1987 between *Deutzia gracilis* 'Nikko' and *D. x rosea* 'Carminea'. The result is a prolific shrub that struts ample, shell-pink blossoms in spring atop a compact, mounded framework. The easy-to-cultivate plants are well suited for massing along walkways or at the front of a mixed border. - 3' Tall, 5' Wide - #2 \$34.99 • #3 \$44.99 (July)

Diervilla rivularis Georgia Bush Honeysuckle - Zone 4 - Full Sun-Part Shade - Southeastern North America

A southeastern US resident that is quite similar to *D. sessilifolia* in appearance and landscape functionality. The major deviation occurs in the quantity of pubescence on the foliage with this species showing a bit more fuzz than its counterpart. Beyond that, most will struggle to pick the two apart in a line-up. - 3-5' Tall and Wide

'**Diwibru01**' - PP 27932 - Sunny yellow foliage is topped in summer by equally cheery yellow flowers, but there's no blending in here! You'll always be able to tell where the flowers are by the pollinators covering every blossom. Autumn brings stunning raspberry red fall color that starts from the bottom and gradually moves to the top! Though plants are shade tolerant, the most eye-catching (and jaw dropping) combination of colors will be displayed in full sun. - 3-5' Tall and Wide - #2 \$34.99 • #3 \$49.99

Diervilla sessilifolia Southern Bush Honeysuckle - Zone 4 - Full Sun-Part Shade - Southeastern North America

A diminutive native of southeastern North America boasting delicate, trumpet-shaped yellow flowers held in groups at the end of the arching stems. The display begins in mid summer and continues into early autumn. Plants are tough as nails, shrugging off infertile soils and exposed locations with little effort. In the landscape they are most valued for erosion control or for consideration in the spots where everything else dies. - 3-5' Tall and Wide

'**LPDC Podaras**' - PP 19391 - A promising selection from the Landscape Plant Development Center that should cause quite a stir in coming years.

The low growing shrubs flaunt rich green leaves that are boldly edged with broad white margins. The bright foliage makes a picturesque complement to the sulfur yellow flowers that appear in mid summer. Plants are lower growing than the straight species and have proven to be an excellent plant for difficult sites or for tight garden spaces that demand attention. - 3' Tall, 4' Wide - #2 \$39.99 • #3 \$49.99 (July)

Diervilla x splendens Hybrid Bush Honeysuckle - Zone 4 - Full Sun-Part Shade - Garden Hybrid

A vigorous interspecific hybrid bush honeysuckle that combines pedigree from the southern bush honeysuckle, *D. sessilifolia*, and its close cousin, the northern bush honeysuckle, *D. lonicera*. This deciduous shrub is excellent in difficult locations including urban conditions and coastal regions. The suckering shrubs reach 4-5' tall with a broader habit with age. Bright yellow, trumpet-shaped flowers are attractive to hummingbirds and other native pollinators when present in summer. Fall foliage, blending shades of burgundy and orange-red, adds appeal to the autumn garden. - 4-5' Tall, 6-8' Wide

'**El Madrigal**' - PP 28060 - A low growing, dark chocolate-purple leaved cultivar of hybrid bush honeysuckle with sunshine yellow flowers and reddish new twigs. Amazing fall color ranges from orange to red to purple, often at the same time. - 4-5' Tall, 6-8' Wide - #2 \$34.99 • #3 \$49.99

Disanthus cercidifolius Disanthus - Zone 5 - Full Sun-Shade - China, Japan

An exceptionally choice and uncommon member of the witch hazel family. One of the most spectacular shrubs for fall color display. The blue-green, heart-shaped leaves transform to brilliant red, purple, and orange tones in late September and early October. After the foliage falls to the ground, intriguing, small, delicate reddish-purple flowers appear. Thrives in moist, acidic, well-drained soil in both sun and shade. Makes a great addition to any woodland garden. - 6-10' Tall and Wide - #2 \$39.99 • #3 \$59.99 (July) • Assorted Specimens Individually Priced

'**Ena Nishiki**' - An extremely rare cultivar of a rare Japanese native woodland shrub species. 'Ena Nishiki' is prized for its 3" heart-shaped leaves that are edged and punctuated with bright cream-white variegation. Like the straight species, the fall color is spectacular with rich burgundy and hot pink tones dominating for more than a month in autumn. Plants are at their best in rich woodland soils under bright canopy shade. - 6-8' Tall and Wide #2 \$44.99 (July) • #3 \$69.99 (July)

'**Rikyu**' - Now that's different! Check out this exceptional form of *Disanthus* from famed Japanese nurseryman Yamaguchi-san. 'Rikyu' develops a congested habit of upright twigs cloaked with blue-cast, heart-shaped leaves. The dense plants develop the same reliable fall color often associated with the straight species that blends burgundy and purple tones with scarlet and orange in fall. Truly unique and rare, certain to be cherished by plant geeks and savvy gardeners alike. - 4-6' Tall and Wide - #2 \$49.99 (July) • Assorted Specimens Individually Priced

Eleutherococcus sieboldianus Fiveleaf Aralia - Zone 4 - Full Sun-Shade - China

An underutilized and highly durable shrub capable of ascending to 8-10' in height. The graceful stems form an arching framework and display palm-shaped, deep green leaves reminiscent of a buckeye. Diminutive, lime-cream flowers appear in rounded clusters among the greenery in spring. A single thorn is born at the base of each leaf which likely enhances the species' resistance and resilience to deer browse. Excellent in average garden soil, though especially useful for foliage impact in dry shade. Often listed as a member of the genus *Acanthopanax*. - 5-10' Tall

'Variegatus' - Variegated fiveleaf aralia is one of the finest and most durable of all variegated plants. Plants are both beautiful and functional in many landscape settings. Forms an upright arching habit and showcases five-parted leaves that are boldly splashed with white and cream variegation. They are at home in full sun and dark shade alike and will grow in nearly all soils except for the most water saturated. A perfect, highly deer resistant choice for that spot where everything else dies. - 5-8' Tall - #2 \$39.99 • #3 \$59.99 (July)

Enkianthus campanulatus Redvein Enkianthus - Zone 5 - Full Sun-Part Shade - Japan

An attractive, easy to grow, deciduous shrub with an upright habit and distinctive horizontal secondary branch structure. The delicate, nodding, bell-shaped flowers appear in May and June in a range of colors from near white to pale yellow to dark reddish-maroon. Fall color can be spectacular and often includes stunning reds, oranges and yellows. Plants work well in a variety of landscape situations and can be trained into small trees if selectively pruned. - 10-20' Tall

'Albiflorus' - A strong growing form that showcases an outstanding framework that supports a wealth of white flowers and excellent fall color. A true garden pleasure. - 8-12' Tall - #2 \$39.99 • #3 \$59.99 (July) • #5 \$89.99 • #7 \$129.99 (July) • Assorted Specimens Individually Priced

'Miyama-Beni' - A strong growing selection of this remarkable Japanese endemic that we've grown for some time now. Plants are among the more vigorous selections that we've offered with large red bell-shaped flowers, each infused with pink highlights. Outstanding fall color blending red and orange with yellow and a valuable silhouette of horizontally oriented side branches adds significant garden appeal. - 8-12' Tall - Assorted Specimens Individually Priced

'Showy Lantern' - A Weston Nurseries selection with abundant, large pinkish-red bell-shaped flowers and brilliant scarlet-red fall color. One of our favorites and surely one of the best cultivars on the market! - 6-10' Tall - #2 \$39.99 • #3 \$59.99 • #5 \$89.99 (July)

Enkianthus perulatus White Enkianthus - Zone 6 - Full Sun-Part Shade - Japan

A striking and refined Asian enkianthus that is unjustly rare in American gardens. The small, deciduous shrubs offer an elegant, tiered branch structure that adds a bit of natural sculpture to the garden. In May, pure white, pendant, urn-shaped flowers accentuate the fresh green leaves and horizontal branching pattern. Autumn brings long lived, shimmering scarlet-red fall color that is the rival of any hardy shrub. Plants are difficult to propagate and slow to establish yet perform admirably for years on end if given a rich, acidic soil with even moisture and good drainage. In the wilds of Japan the species is said to favor rocky slopes. - 6-8' Tall and Wide - Assorted Specimens Individually Priced

Euonymus americanus Strawberry Bush - Zone 6 - Part Shade - Eastern North America

A native and well-behaved counterpart to the invasive and overused burning bush. As the common name "hearts-a-bursting" suggests, this woodland shrub is best known for its warty red capsules that burst open to reveal bright orange seeds. Fantastic scarlet fall color and fresh green stems that retain their color through the winter round out the multi-season interest of this little-known and underutilized plant. - 4-6' Tall and Wide - #2 \$34.99 • #3 \$59.99 (July) • #7 \$99.99

Forsythia viridissima Green Stem Forsythia - Zone 4 - Full Sun-Shade - China

This Chinese native forms one half of the parentage of the better-known Forsythia x intermedia. Much stiffer and more upright in habit than its better known counterpart, F. viridissima matures at 6-10' tall and heralds spring with bright yellow-chartreuse flowers, typically borne in clusters of 2-3. Plants thrive in the toughest of sites showing adaptability to varied soil texture, drought, light exposure and even aggressive pruning. The straight species is quite rare in cultivation though its durable nature suggests it should be considered more widely in challenging locales. - 6-10' Tall and Wide

'Kumson' - A new selection which offers eye-catching leaves that appear to be "netted" in white variegation. A very unusual and attractive variegation pattern. - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Forsythia x intermedia Hybrid Forsythia - Zone 4 - Full Sun-Shade - Garden Hybrid

Vigorous and strong growing, the straight hybrid has been sorely overused in many landscapes throughout the region. Though we shy away from recommending the standard form, there are some exciting cultivars out there worth taking a closer look at! As most know, the habit is very fountainsque when allowed to grow freely, but they take exceptionally well to pruning if desired. These shrubs make respectable informal hedging options, particularly against an encroaching wood line or when a barrier is needed. Bank stabilization and use in dry shade are less common uses worth contemplating. All cultivars flower early in spring on old growth before leaf emergence. Pale to medium green leaves capable of displaying vibrant purple fall color in sunny exposure provide added appeal. - 8' Tall, 15' Wide

'Gold Leaf' - A restrained forsythia cultivar with soft, butter yellow foliage. Plants perform best in partial shade as full sun may scorch the delicate leaves. The mature specimen in our witch hazel border has been long admired by our customers. - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

'Golden Times' - Leaves emerge a butter yellow with a slowly expanding, irregular green center and random cream splashes. Plants are equally at home (and equally stunning) in both full sun and in dense shade, and particularly valuable for those problem corners where little else will grow. We've long cultivated this beneath the canopy of a sugar maple where it has performed eminently well, a testament to its tolerance to the harsh rigors of dry shade. - 8-10' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

Fothergilla gardenii Dwarf Fothergilla - Zone 5 - Full Sun-Part Shade - Mid-Atlantic and Southeastern United States

A variable small shrub, usually growing less than 3' in height. Plants have a narrow native range that is restricted to the coastal plain from North Carolina to Florida where they inhabit transitional zones between wet pine savannas and moist shrub-bogs. In the ornamental world, plants are best known for their fragrant, bottlebrush-like flowers and spectacular fall color. Plants are suitable for use in most acid, drought-free landscape situations. - 3' Tall, 4' Wide

'Blue Elf' - Small, delicate, decidedly blue leaves layer themselves along slim twigs that form a low, mounding habit. Familiar fragrant, feathery blossoms and timeless fall color round out the seasonality. Perfect for smaller yards, tiny nooks, or even the pickiest garden gnome's corner. - 3' Tall, 4' Wide #2 \$39.99 • #3 \$59.99 (July)

'Harold Epstein' - A choice diminutive selection that originated in the garden of the late plantsman extraordinaire, Harold Epstein. In early May, 1" sweetly fragrant, white flowers provide a charming display just as the foliage is emerging. The small, thumb-sized leaves are rich green during the growing season and take on good yellow, orange and red tones in fall. - 2' Tall, 3' Wide - #1 \$29.99 • #2 \$39.99 (July)

Fothergilla x intermedia Hybrid Fothergilla - Zone 4 - Full Sun-Part Shade - Garden Hybrid

A group of hybrid plants resulting from open pollinated crosses between F. gardenii and F. major grown in close proximity in both nurseries and gardens. Specimens demonstrate intermediate characteristics of the parents and are all worthy garden plants. - 5-8' Tall

'Blue Shadow' - An exciting selection of Fothergilla that offers much promise. This unique sport of 'Mt. Airy' demands attention with its glaucous-blue leaves that are present throughout the summer months. In fall, the red, orange and yellow chameleon-like display is equally impressive. Plants flourish in the garden and offer a vast improvement over other "blue" leaf forms. - 5-8' Tall - #2 \$34.99 (July) • #3 \$49.99 • #5 \$69.99 (July)

'Mt. Airy' - An outstanding selection made by Dr. Michael Dirr from a plant found growing in Mount Airy Arboretum in Cincinnati. Excellent fall foliage display of red, orange and yellow. An industry standard and excellent garden plant. - 5-8' Tall #2 \$34.99 • #3 \$49.99 • #5 \$69.99 (July) • Assorted Specimens Individually Priced

Hamamelis mollis Chinese Witch Hazel - Zone 5 - Full Sun-Part Shade - Central China

A large multi-stemmed shrub long valued in cultivation though endangered in its native haunts. Plants develop clusters of sweetly fragrant, golden-yellow flowers in March that are among the largest this fantastic genus has to offer. The medium green leaves often have a thin coat of fuzz and bright peach-yellow color reliably each fall. - 12-15' Tall and Wide

NEW 'Angel' - Ethereal yellow flowers backed by dark calyces glow along the branches in February and March, lending a welcome glow to the dreary, dormant landscape of the winter season. We love these plants; their beauty and delicate nature in the face of the harshest of weather never fails to amaze us! - 12-15' Tall and Wide - #5 \$89.99 • #7 \$129.99 (July)

'Wisley Supreme' - An outstanding form with many highly fragrant blossoms appearing over an extended period in late winter and early spring. - 12-15' Tall - #2 \$39.99 (July) • #3 \$49.99 • #5 \$69.99 (July) • **Assorted Specimens Individually Priced**

Hamamelis vernalis Vernal Witch Hazel - Zone 4 - Full Sun-Part Shade - Central and Southern United States

A durable, multi-stemmed, rounded shrub developing strap-like, yellow-orange flowers in late winter. Flowers are fragrant and remain effective for up to a month. Consistent bright yellow fall color provides added seasonal interest. - 10-15' Tall and Wide

'Amethyst' - A unique selection discovered by witch hazel maniac Tim Brotzman and named by Don Shadow. Offers striking lavender-purple flowers and equally impressive red and orange fall color. - 10-15' Tall - #2 \$39.99 (July) • #3 \$49.99 (July) • #5 \$69.99 (July) • **Assorted Specimens Individually Priced**

'Beholden' - A curious and unique vernal witch hazel that is the result of a cross between the purple flowering H. vernalis 'Amethyst' and decidedly early blooming H. vernalis 'Holden'. The result is a pale orange blooming witch hazel that begins its floral display in November rather than the mid to late winter bloom period long associated with this species. Quite fun to see this blooming out of sync with the other members of its species and especially exciting to contemplate breeding adventures with this as a parent for future generations. - 10-15' Tall - #2 \$39.99 • #3 \$59.99 • #5 \$89.99 (July)

'Burmazam' - A beautiful selection with multi-season appeal! Rich orange-red flowers with dark centers cover the low, wide spreading habit in early spring. Burgundy flushed new growth adds color through the growing season before finishing the year with golden tones. - 10-15' Tall
#3 \$59.99 • #5 \$89.99 • #7 \$129.99 (July)

'Goleczam' - Witch hazels are usually all about the flowers, and late winter's orange-yellow flowers certainly don't disappoint. But no less stunning for this unique character is the late summer new growth, which unveils very distinctive orange and purple tones before transitioning to purple to finish off the year. Who says you can't have your cake and eat it too? - 10-15' Tall - #3 \$59.99 • #5 \$89.99 • #7 \$129.99 (July)

'Quasimodo' - A semi-dwarf selection introduced to the European nursery industry in 1980. Unfortunately, plants have only started to trickle into the US trade over the past couple of seasons. Plants are best noted for their highly fragrant, light orange flowers and compact-spreading habit. The foliage is rich greenish-blue and quite attractive throughout the season. - 4-6' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

Hamamelis virginiana Common Witch Hazel - Zone 3 - Full Sun-Part Shade - Eastern and Central North America

A large, native, multi-stemmed shrub developing abundant, 4-petaled, butter-yellow flowers in September and October. Fall foliage can be an eye-catching, clear-yellow. - 15-20' Tall

'Copper Curls' - A 2021 Broken Arrow Nursery introduction that has been under evaluation for more than a decade. The initial plant was discovered as a chance color break seedling in a wild population in Prospect, CT. As the name suggests, plants boast impressive, ribbon-like, burnt-orange and copper flowers in autumn. The petals maintain a curious wavy quality to them through the bloom season with intensifying saturation as cool weather develops. In our trials, specimens have shown strong vigor, pest resistance and a consistent propensity to shed foliage during bloom time adding to the ornamental allure. - 15-20' Tall - #2 \$39.99 (July) • #3 \$59.99 • #5 \$89.99 • #7 \$129.99 (July) • **Assorted Specimens Individually Priced**

'Green Thumb' - A variegated selection discovered at Hidden Hollow Nursery. Foliage is medium green with a broad, irregular yellowish-green margin. The variegation pattern is stable and resistant to sunburn. Still very rare in cultivation yet valuable for added seasonal interest during the growing season. - 8-12' Tall - #2 \$39.99 (July) • #3 \$59.99 (July) • **Assorted Specimens Individually Priced**

'Harvest Moon' - An exciting Broken Arrow Nursery introduction that we discovered in a client's garden. The upright, vase-shaped habit of 'Harvest Moon' supports attractive, burgundy-flushed new growth that matures to dark green. In late fall, plants offer numerous clusters of large, lemon-yellow flowers that are closely spaced along the branches. The overall effect is a much showier display than is common for the species. In our trials, plants have flowered up to two weeks later than the species and remain showy after the foliage drops. - 15-20' Tall
#2 \$39.99 • #3 \$59.99 • #5 \$89.99 • #7 \$129.99 (July) • **Assorted Specimens Individually Priced**

'Little Prospect' - A true treasure, this compact, densely branched cultivar of common witch hazel showcases green leaves edged with a vibrant and bold gold margin. Heavy masses of cheery yellow flowers in fall and early winter end the garden season nicely. The sun tolerant leaves are among the most dramatic of the variegated Hamamelis that we've come to know and we expect this one to quickly become a favorite. - 12-15' Tall
#2 \$39.99 • #3 \$59.99 • #5 \$89.99 (July) • #7 \$129.99

'Lemon Lime' - A beautiful selection of common witch hazel boasting colorful pale green leaves that are heavily splashed and accented with golden-yellow highlights. Plants add a delicate enhancement to the garden and are notably slower growing than standard forms. Soft yellow blossoms with a subtle earthy-sweet fragrance add an extension to the gardening season into October and November. - 6-8' Tall and Wide - #2 \$39.99 (July) • #3 \$59.99 (July)

'Winter Champagne' - A strong growing and attractively fragrant selection of witch hazel valued for its extra long bloom time of striking yellow flowers with orange centers. Some feel that this is more accurately classified as a hybrid between the common witch hazel (Hamamelis virginiana) and vernal witch hazel (H. vernalis). At maturity this cultivar is expected to be slightly larger than most members of the group with a floral display that extends well into winter. What else can you ask for from a fall blooming witch hazel? - 15-20' Tall - #2 \$39.99 (July) • #3 \$59.99 • #5 \$89.99 • #7 \$129.99 (July)

Hamamelis x intermedia Hybrid Witch Hazel - Zone 5 - Full Sun-Part Shade - Garden Hybrid

A highly variable group of shrubs that represent hybrids between H. japonica and H. mollis. Plants are exceptionally vigorous and we've been amazed at the range of floral and foliage characteristics. Surely one of the best shrubs to awaken the garden in late winter. We are happy to offer an ever expanding selection of fine cultivars. - 10-20' Tall and Wide

'Arnold Promise' - A fragrant, clear-yellow flowered form. Selected by the Arnold Arboretum and one of the best yellow cultivars on the market. - 15-18' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Barmstedt Gold' - A vibrant cultivar showcasing a magical display of rich golden-yellow flowers brushed with tints of red at the base of each petal. The vigorous plants are upright in youth becoming broader with age. One of the best. - 10-15' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Candlelight Vigil' - An under publicized and little known cultivar selected and introduced by Hamamelis leader Tim Brotzman. 'Candlelight Vigil' offers up memorable vibrant yellow blooms with good fragrance in early spring, at a time when most other selections have moved beyond their flowering cycle. Named as a glowing candle to the students lost and injured in a terrible school shooting in Chardon, OH. - 10-15' Tall - #3 \$59.99 • #5 \$89.99 (July)

'Diane' - A popular red-orange flowering selection with dramatic yellow-orange-red fall foliage. One of the best red forms available. - 10-15' Tall
#2 \$39.99 (July) • #3 \$59.99 (July)

'Double Gold' - A variegated sport discovered on a plant of Hamamelis x intermedia 'Westerstede' in the Netherlands. Foliage emerges in spring with a bright yellow margin aging to creamy-yellow as the season progresses. Medium yellow, stiff petaled, faintly scented flowers are present in late winter. Rare, Rare, Rare! - 10-15' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Foxy Lady' - A recent selection from author and witch hazel guru Chris Lane. This hybrid boasts an impressive floral exhibition of oversized sultry-red petals that are amongst the deepest yet achieved. Blossoms appear in late winter and offer an earthy-sweet fragrance that is difficult to describe yet pleasant and memorable. The standard-sized shrubs are best in a sunny exposure with a supporting cast of plants and garden elements that enhance the display. - 10-15' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Gingerbread' - A distinctive de Belder selection with sumptuous burnt-orange flowers said to be reminiscent of gingerbread cake. Plants are good strong growers forming bushy, spreading specimens. Handsome purple tinted emerging growth provides added seasonal appeal. - 10-15' Tall
#2 \$39.99 (July) • #3 \$59.99 (July)

'Orange Encore' - An indispensable late blooming cultivar that adds an exclamation point to the end of the witch hazel season. In late spring, the compact-spreading plants unfurl a strong display of frilly, fragrant orange flowers that provide a seasonal extension far beyond the status quo. Burgundy flushed new growth in early May provides added appeal and a bit of icing on the cake. - 10-15' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Orange Peel' - A fine witch hazel nurtured at the de Belder estate and introduced in the late 80's. Plants are dependable performers, owing their name-sake to the prominently curled petals and clear orange flower color. Foliage remains impressive and attractive throughout the gardening season with reliable leaf shed during bloom time. Young plants have an upright branch structure but gain width with age. - 10-15' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Sweet Sunshine' - A highly regarded Broken Arrow Nursery selection that has grown next to our main driveway for years. The upright plants offer fragrant, bright yellow flowers and solicit comments from nearly all customers when in flower in early spring. Formerly listed as *H. mollis* 'BAN Select'. - 10-15' Tall - #2 \$39.99 (July) • #3 \$59.99 (July) • **Assorted Specimens Individually Priced**
'Tsukubana Kurreani' - A promising selection made by Japan's Hisao Tsukada that showcases a brilliant display of large, twisted purple-red blossoms. Our young plants have drawn a lot of excitement, enough to elicit the classic stop and drool response. Reportedly discovered as a chance seedling from the classic hybrid selection 'Diane'. Formerly incorrectly listed as a selection of the Japanese witch hazel, *Hamamelis japonica*. - 8-12' Tall (Guess) #2 \$39.99 (July) • #3 \$59.99 • #5 \$89.99 (July)

Hibiscus syriacus Rose-of-Sharon - Zone 5 - Full Sun - China, India

A familiar large, upright shrub grown for its tropical looking, 4-5" flowers ranging in colors from white and pink to purple and blue. An eye-catcher in autumn when in full floral display. Tolerant of all well-drained soils. - 6-12' Tall and Wide

(White New Growth) - A funky hibiscus with a straight forward name that has recently captivated our attention. Plants are strong growers showcasing a spring flush of growth that emerges completely white. Green pigments do develop as the season progresses yet a second flush of growth in July brings on an ensuing display of multicolored leaves. Familiar, rich pink single blossoms provide a final act of color in late summer. Plants are certainly not everyone's slice of cake yet a fun, adventurous option for those looking for a little more from a rose-of-Sharon. - 8' Tall, 5' Wide (Guess)

Assorted Specimens Individually Priced

'Antong Two' - PP 19547 - A highly regarded rose-of-Sharon offering elegant white flowers enhanced by an intense, burgundy-red eye. The abundant, long-lived flowers are complemented by robust, dark green leaves and a compact growth form. - 4-5' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Hydrangea angustipetala Monarch Hydrangea - Zone 6 - Full Sun-Shade - China, Japan, Taiwan

A highly variable species native to select regions of Japan, China and Taiwan where it is represented by both deciduous and evergreen forms. Plants typically show off high gloss, deep green leaves with angled margins and have the capacity to reach 5-6' in height and spread. The lacecap flowers are present from late spring to early summer and combine large, pure white, sterile florets with unique cream-yellow fertile flowers. - 5' Tall and Wide

'Mon Long Show' - A choice, 2008 Dan Hinkley selection that impresses with its tremendous lacecap floral display. In late spring the 5' rounded shrubs reveal two-toned panicles comprised of coarsely toothed white sterile florets set off by pale-yellow fertile blossoms. As an unexpected dimension the flowers emit a pleasing sweet perfume, a trait nearly unheard of in the world of hydrangea! The narrow leaves have an overall glossy finish and may remain partially evergreen in mild climates. - 5' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

Hydrangea arborescens Smooth Hydrangea - Zone 3 - Full Sun-Shade - Eastern North America

A tremendously variable species found growing in moist, fertile, shady corners of the eastern United States. The charming flower corymbs frequently consist of many creamy fertile flowers surrounded by a disk of showy white florets. Grows best in moist, organic rich soils in shade or full sun. - 4-5' Tall, 6-8' Wide

'Green Dragon' - A curiosity of nature that offers unusual twisted and heavily serrated leaf margins on a semi-compact plant. Certainly high in "wow factor" and a must for those looking for an oddball hydrangea to add to the garden. - 4' Tall and Wide - #2 \$34.99 • #3 \$49.99

'Haas Halo' - PP 21302 - Hydrangea 'Haas Halo' promises to be a fine addition to the diversity of smooth hydrangeas in the collection. The superbly vigorous plants boast dark-green leaves of heavy substance that stand in stark contrast to the oversized pure white blossoms. The lacecap flowers begin the show in June and often continue into fall. Though they have been reported to reach as much as 14" in diameter, we haven't yet seen these proportions. That said, our plants did indeed have very sizeable inflorescences. Even more important, the sturdy stems resisted flopping, a true asset for this species. Discovered by Rick Ray of Pennsylvania. - 5' Tall, 6' Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Hayes Starburst' - A recent selection that was discovered by Hayes Jackson as a self-sown seedling in his garden. Plants offer unique, double white florets and tend to be more compact than the species. - 3-4' Tall and Wide - #2 \$34.99 • #3 \$49.99

'NCHA3' - Invincibelle® Ruby - PP 28317 - An improved pinkish-red flowering selection of smooth hydrangea that adds deeper color saturation to the blooms and stronger stems to show them off. The intricate flowers emerge from bright red buds and take on pink tones when open. They stand atop sturdy stems that are dressed with handsome deep green leaves. - 3-4' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'Samantha' - A brilliant selection of this underutilized subspecies of smooth hydrangea with numerous, silver-white sterile flower corymbs that are set off by striking, white-backed leaves. One of our favorite hydrangeas. - 4-5' Tall, 6' Wide - #2 \$34.99 • #3 \$49.99 (July)

Hydrangea aspera var. macrophylla Rough Leaf Hydrangea - Zone 6 - Full Sun-Shade - Central China

A confusing and complex group of garden worthy hydrangeas that we are starting to find some success sorting out (at least for today). This variety indeed appears to be very closely allied to *H. a. var. sargentiana* and in fact we have likely sold plants incorrectly in the past. Though similar, at close inspection, the leaves of this variety are a bit smaller than that of Sargent's rough leaf hydrangea and the plants tend to develop a broader framework. The felted leaves are superb yet seem to have less fuzzy wuzzyness, particularly on the stems and leaf backing. Beyond these minute differences, plants are supreme specimens with massive white and lavender bicolored lacecaps in summer. - 8-10' Tall - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Hydrangea aspera var. villosa Rough Leaf Hydrangea - Zone 6 - Full Sun-Shade - Central China

A hydrangea to die for that takes a step apart from the classic vision that most associate with this valuable genus. The long, oval leaves of the rough leaf hydrangea are greenish-blue and are covered with dense hairs that add a felted textural quality to the garden. In late summer, stylish lavender-mauve, lacecap flowers decorate the stems and create a thrilling display for an extended time. Like most hydrangeas, plants are vigorous growers in average to rich soil with consistent moisture through spring and summer. - 8-10' Tall

'Koki' - A tremendous advancement in the world of hydrangeas that promises to become a valuable garden shrub. Rich, sexy purple foliage with a felted, velvet finish sets 'Koki' apart from its peers. The color is dramatic and persistent with reports that suggest it remains captivating throughout summer. Though the foliage is remarkably different than most, the considerable lilac-mauve lace caps in summer are much more reminiscent of classic hydrangeas. The original plant was discovered by Mikinori Ogisu while on a plant exploration adventure in Hubei Province, China. To date, plants have been circulated in the trade under the names 'Burgundy Bliss', 'Plum Passion' and (Red Leaf Form). - 6-8' Tall - #2 \$39.99 • #3 \$59.99 • #5 \$79.99 (July) • #7 \$129.99

Hydrangea involucrata Bracted Hydrangea - Zone 6 - Full Sun-Shade - Japan, Taiwan

A rarely cultivated species hydrangea native to Japan and Taiwan where plants top out around 5' in height and spread. The oval leaves are covered with dense hairs that add a seductive texture and provide a fine complement to the unusual, rounded floral buds. In summer, plants are crowned by delicate white to lilac-blue lacecaps that remain attractive for weeks. Plants flower on both old and new growth so a dependable display is present year in and year out. - 3-5' Tall and Wide

'Yokudanka' - This small and elegant hydrangea sports captivating pastel pink and pale lavender panicles at peak summer display. Flowers evolve with age adding tones of lime and cream to the mix at times. The felted leaves of the compact plants provide additional interest when looking beyond the blooms. We've adored this for years in the collection and are happy to finally have a few to share. - 3-4' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

Hydrangea macrophylla Bigleaf Hydrangea - Zone 6 - Full Sun-Part Shade - Japan

An incredibly popular and valuable group of summer blooming shrubs that add exceptional beauty to the garden. Flower color can range from blue to purple to pink and just about everything in between. Interestingly, the flower color is highly dependent on soil pH with acidic soils providing bluer flowers and basic soils resulting in pinker flowers. All develop into 3-6' tall specimens noted for their large waxy leaves and sturdy branches. Flowers develop on old twigs so care should be taken when pruning. - 5-6' Tall

'Ayesha' - A pale-pink to lilac-blue mophead hydrangea with unique, cup-shaped florets. First rate, waxy green leaves provide added interest when flowers aren't present. - 5-6' Tall - #3 \$49.99 • #5 \$59.99 (July)

NEW 'Bailmacseven' - PP 34544 - A remarkable new selection offering leaves as dark as midnight crowned in midsummer with equally dusky mopheads of dark maroon double florets with pale, moonlit centers. It's hard not to get excited about what seems to be one of the more thrilling bigleaf hydrangeas to hit the market in recent memory! - 3-4' Tall - #3 \$49.99 • #5 \$59.99 (July)

'Dancing Angel' - PP 20140 - Pale, spring green buds open to either blue or pink mophead flowers (depending on soil pH), with dark flecks and streaks scattered throughout in carefree abandon. The distinctive plants stand out in the crowded room that this species has become. - 3-4' Tall #3 \$49.99 • #5 \$59.99 (July)

'Dancing Snow' - PP 21052 - A choice, double-flowered, lacecap selection of bigleaf hydrangea comprised of an elegant presentation of satin white florets. Flowers are backed with the familiar deep green leaves of the species and plants offer superior hardiness when compared to many standard forms. Overall a very graceful plant with floral qualities creative enough for a bridal bouquet. - 3-4' Tall - #2 \$34.99 • #3 \$49.99 (July)

'H20-02' - Miss Saori™ - PP 26657 - The long awaited 2014 RHS Chelsea Flower Show Plant of the Year has made its way to US soil. This incredible mophead bigleaf hydrangea boasts double, white florets elegantly edged with red margins. The long-lived flowers emerge over a long bloom period and develop on both new and old stems. As an added seasonal feature the new growth in spring emerges with a heavy overlay of burgundy. Google an image and you will drool! - 4-6' Tall - #3 \$49.99 • #5 \$59.99 (July)

NEW 'H21-3' - Wowtime® - PP 27935 - An utterly unique cultivar of bigleaf hydrangea with huge mophead-type flowers that emerge touched with green and mature through shades of pink to a deeply saturated coral. Best of all, the sharply pointed, star shape florets layer on top of each other like an origami bouquet over thick, deep green, nearly corrugated leaves. Some literature indicates that this selection may be a hybrid with *Hydrangea paniculata* though the patent paperwork correctly positions this as a selection of the straight species *H. macrophylla*. - 4-6' Tall - #3 \$49.99 • #5 \$59.99 (July)

'Hatsushimo' - Those who know and garden with us recognize that we are constantly on the prowl for plants that offer unique foliage qualities. This obsession is what brought us to *Hydrangea macrophylla* 'Hatsushimo' as its thick green leaves of heavy substance showcase a prominent overlay of white streaking. In summer the 3' specimens are accented with familiar blue (or pink) lacecaps. Occasional green shoots may develop and should be removed so that they don't overtake the plants. Though pruning out reversions is often viewed as a hassle, the annual maintenance for this fine plant is well worth the added care consideration. - 3-4' Tall - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'Hokomabebos' - PPAF - A choice reblooming bigleaf hydrangea that we feel is among the better of the overwhelming selections presently in commerce. The compact plants impress with a dazzling display of two-toned white and pink sterile florets each elegantly etched with a clean red margin. Impressive rich green leaves are overlaid with burgundy tones forming a striking backdrop. This fine selection from the Netherlands' renowned Kolster BV was recognized at the 2021 Farwest Show as the People's Choice winner! - 2-3' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'Horwack' - PP 25577 - A mold breaking bigleaf hydrangea that seeks to persuade us that this fine group of plants has much more to offer than just blue or pink flowers. Rather than status quo, this eclectic sister struts mophead flowers that blend varying tones of red, purple, bronze and green on both new and old growth! Certainly not your grandma's old-fashioned hydrangea, yet distinctive and attractive in its own right. - 4-6' Tall #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'New Wave' - A brilliant sport of 'Lemon Wave' discovered at Oregon's Cistus Nursery. The color of the leaves is a complex blend of white, cream, gold and lime-green that is difficult to describe yet sufficient to elicit the stop and drool response. After a few years of work we've finally built up enough stock to offer this treasure! - 3-4' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

'Penny Mac' - An underappreciated yet highly impressive reblooming cultivar of bigleaf hydrangea that has been overshadowed by the more highly praised cultivars. Plants stand up against the best with an abundance of blue or pink flowers on both old and new growth throughout the rounded framework. Selected and introduced by Penny McHenry, founder of the American Hydrangea Society. - 5-6' Tall - #3 \$49.99 • #5 \$59.99 (July)

NEW 'Turtle Toes' - Shades of green have never looked so good! Lime-green mopheads with a striking white dot in the center of each floret contrast beautifully with the deep, emerald green foliage. It's a breath of fresh air to have such a unique and different option in a genus that is filled with redo's and look-alikes! - 3-4' Tall - #3 \$49.99 • #5 \$59.99 (July)

'Zebra' - PP 18688 - A brilliant new hydrangea well named for its clean white flowers that contrast in a dramatic fashion against seductive, polished black stems. Each sizeable inflorescence is comprised of up to 200 individual florets held prominently atop sturdy stems that form dense, shapely mounds. - 3-4' Tall - #2 \$39.99 (July) • #3 \$59.99 (July)

Hydrangea paniculata Panicle Hydrangea - Zone 3 - Full Sun-Part Shade - China, Japan, Taiwan

An exceptionally hardy species planted frequently throughout the 19th and 20th century. Plants form large, arching shrubs or small trees and display massive flower panicles reaching up to 18" in length. The white flowers appear in late summer on the current season's growth. As the inflorescence age the florets turn brilliant, pale-pink tones. Overall, a durable garden plant, tolerant of most soils, with the exception of excessively wet areas. - 10-20' Tall and Wide

'Dharuma' - A superb hydrangea valued for its compact habit and early floral display. In early summer, 4-5" flower panicles appear on sturdy stems cloaked with thick, dark green leaves. Flowers appear several weeks earlier than other peegee hydrangeas and age to pale-pink as the season progresses. Without a doubt this selection is destined to become a valuable plant for smaller gardens, even with the less than desirable name! - 5-6' Tall

#2 \$34.99 (July) • #3 \$49.99 (July)

'Limelight' - An elegant panicle hydrangea with unique, green-blushed flower panicles held atop sturdy, upright stems. Flowers begin to appear toward the end of July and last into late fall, becoming blushed with pink as they age. A very garden worthy selection! - 8-12' Tall - #3 \$49.99 • #5 \$59.99 (July)

'Wims Red' - PP 26005 - A choice and recent selection of panicle hydrangea that draws attention with a dynamic floral display starting with classic white florets that transition to astonishing tones of magenta and scarlet in late summer and fall. Panicles are set off by deep green leaves and current season's twigs that are suffused with vibrant red. The compact plants retain the classic durability and garden value of this fine species. - 5-6' Tall and Wide #3 \$49.99 • #5 \$59.99 (July)

'Yuki Ghessho' - A highly desirable variegated clone of peegee hydrangea that illuminates the garden with creamy-white marbled foliage. Plants are vigorous growers performing best in a bright, lightly shaded locale. Certainly full of charm and a welcome garden addition. - 6-8' Tall

#2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Hydrangea quercifolia Oakleaf Hydrangea - Zone 5 - Full Sun-Part Shade - Southeastern North America

One of the finest plants accessible to home gardeners and landscape professionals alike. These large, rounded, deciduous shrubs are named for the shape of their large, oak-like leaves. In May and June they bless the garden with their elegant display of 4-12" cone-shaped white flower panicles. Over the next several weeks the flowers age to shades of pink and wine red. In time, the flowers become completely dry and are wonderful to use in everlasting floral arrangements. Fall color can be spectacular with burgundy and maroon tones prevailing. As winter sets in, the cinnamon-brown flaky bark commands much attention. Easily grown, oakleaf hydrangea is a must for all gardens. Excellent when planted en masse, or at the edge of a woodland. - 4-8' Tall, 6-12' Wide

'Little Honey' - A stunning hydrangea that brings a whole new dimension to this delightful species. In spring, the foliage emerges electric gold and slowly ages to chartreuse, just as numerous, white, pyramidal flower clusters appear. In fall the leaves once again transition in color, this time to superb shades of scarlet and burgundy. - 4' Tall and Wide - #2 \$39.99 (July) • #3 \$59.99 (July)

'Munchkin' - A 2010 selection from the US National Arboretum that has much promise for its compact, improved rounded habit comprised of dense branching and deep green oak-like leaves. In early summer, plants are cloaked with 6" blossoms that emerge white and pick up pink tones with age. Flowers are abundant and provide a fine complement to autumn's mahogany-red leaf tones. An excellent selection for small properties or foundation plantings. - 4-5' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'Ruby Slippers' - An exciting form from the US National Arboretum that combines the fine pedigree of two classic oakleaf hydrangeas. Plants develop a compact, rounded stature of deep green oak-like leaves and cinnamon exfoliating stems. In late June, masses of 9" cone-shaped inflorescences stand upright and crown the specimens. Flowers emerge white and age through shades of pink and ruby by autumn. Long lasting maroon-scarlet fall color provides added flair. - 4-5' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • #7 \$99.99

'Snowflake' - An amazing, "wow" plant with large, 8-12" inflorescences blessed with additional sepals, creating a double-flowered appearance. Truly spectacular and one of our favorites! - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Snowqueen' - A show-stopping, classic form of oakleaf hydrangea with upright, pure-white, 8', cone-shaped inflorescences. Remarkable, burgundy-red fall color. A Princeton Nursery selection. - 8' Tall, 12' Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Hydrangea scandens Scandens Hydrangea - Zone 7 - Full Sun-Part Shade - Japan

An extremely rare species native to Japan sometimes listed as *Hydrangea luteovenosa*, though at the time of writing *H. luteovenosa* is more often considered a subspecies of *H. scandens*. Though plants have a compact habit, they offer an outsized garden presence with narrow, finely textured, clear green leaves that are often slightly downy beneath. In late May through June, fragrant white lacecap flowers appear, typically composed largely of tiny fertile flowers surrounded by showy sterile florets. Plants appear to appreciate even moisture and full sun to part shade, though they are extraordinarily rare in cultivation and may be more durable than we realize - we're excited to continue to learn about this plant and invite you to learn with us! - 3-5' Tall and Wide

NEW 'Fragrant Splash' - One of the coolest hydrangeas to emerge on the market featuring a continuous riot of ever-changing color throughout the year. Spring leaves emerge purple before developing a yellow splashed variegation pattern that evolves to a mosaic of white and green before returning to purple and gold in the fall. Surprisingly fragrant, white lacecap flowers cover the shrub in late spring and appear to be quite popular with bees and humans alike! Though plants are adaptable to both full sun and part shade, they seem to do better with increasing sun in our region provided they are sheltered from excessive wind and positioned away from frost pockets. - 3-5' Tall and Wide - #2 \$39.99 • #3 \$59.99 (July)

Hydrangea serrata Mountain Hydrangea - Zone 5 - Full Sun-Part Shade - Japan, Korea

A fine species of hydrangea native to the upland forests of eastern Asia and Japan. Plants are similar in many respects to *Hydrangea macrophylla* yet generally remain more compact and display smaller flowers and leaves. Additionally, they offer superior cold hardiness with many cultivars performing admirably in zone 5 exposures. Numerous cultivars exist, many of which display elegant, lacecap flower structure. We're excited to be able to offer an expanded selection of some of the finest forms available! - 4-6' Tall and Wide

'Blue Bird' - A classic hydrangea revealing masses of sky blue, lacecap flowers in mid-summer. Superior cold hardiness and a restrained growth habit make it an excellent candidate for smaller gardens. - 4-6' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

'Chiri-San Sue' - A beautiful addition to the diversity of mountain hydrangea in our collection. The upscale 'Chiri-san Sue' impresses with abundant airy inflorescences comprised of spectacular double sterile florets backed by smaller fertile blooms. Flower color ranges from near white to pale blue depending on soil pH though all will age through shades of antique pink mixed with green. Discovered in the wilds of the sacred Mount Chiri in South Korea by renowned plant collector Dan Hinkley. - 4-6' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

'Hallasan' - A fun and unique selection of mountain hydrangea that was discovered in South Korea's Hallasan National Park. Plants have a distinct growth form reaching only 2-3' tall but develop spreading branches that trail along the ground forming a groundcover-like quality. Traditional pale pink or blue lacecap flowers add seasonal appeal during the summer months. - 3' Tall, 5' Wide - #2 \$34.99 • #3 \$49.99

'Kiyosumi' - A distinctive lacecap hydrangea that was discovered on the slopes of Japan's Mt. Kiyosumi. In mid-summer, plants provide instant impact with their elegant, pink, lacecap flowers stenciled with thin red edging around each sterile floret. Clever, burgundy-tinted foliage and prominent venation extend the season of interest. We think very highly of it, as does Dan Hinkley, who noted in the 2002 Heronswood catalog that "Of all the new additions of Hydrangeas we have amassed over the decade, I would be hard pressed to name one as sensational as this". - 4-6' Tall and Wide #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Kokonoyama' - A fine mountain hydrangea that we've been playing around with for a number of years. After many requests and much excitement we've finally propagated enough to offer it. The dense, rounded plants blend green with a wash of gray flecks and streaks giving the plants a decidedly silver sheen. Pink or blue lacecap flowers provide added value during the summer months. - 2' Tall, 3' Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Maiko' - A dainty and uncommon mountain hydrangea sporting pastel pink or blue inflorescences through summer and into fall. Flowers blend extremely well with the diminutive, half-sized leaves. An excellent option for tight garden corners where the compact habit becomes a strong asset. - 2-3' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

'Miyame-Yae-Muraski' - A stunning Japanese introduction that translates to "Deep mountain-many layers-purple". Plants present striking panicles of pink-blushed sterile flowers encompassed by stylish, extremely double, pastel pink or lavender-violet florets. The flower panicle is not quite a lacecap composition but has more of an airy, open structure mophead form. As the flower heads mature they transition to shades of burgundy-red, extending the display period into autumn. - 4-6' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'Mountain Mania' - A recent introduction from friend and outstanding plantsman Ed Bowen. This fun and brilliantly colored hydrangea sports outrageous orange new growth that softens to a sunny yellow with a reddish-maroon tint during the growing season. In summer, plants are topped off with blue or pink lacecap flowers. In our mind this is amongst the more exciting mountain hydrangea selections to hit the market in recent years. - 3-4' Tall and Wide #2 \$34.99 • #3 \$49.99

'Omacha Variegata' - A remarkable variegated hydrangea sure to impress with its uniquely colored leaves that are heavily speckled and mottled with cream and gold. In summer, the mounded plants are topped with elegant lacecap flowers of pale blue or pink. We're confident that this is one of those fine plants that all collectors and garden enthusiasts will want. - 3-4' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Woodlander' - A fine mountain hydrangea selected from a batch of seed acquired from Korea's famed Chollipo Arboretum and introduced by Bob McCartney of Woodlanders Nursery. The compact plants sport green leaves that display varied levels of purple tones through the growing year. The abundance of purple is impacted by timing and sun with the greatest expression present early in the season in sun-drenched exposure. Classic lacecaps provide added seasonal appeal during summer. Plants have been distinct and impressive among the diversity of hydrangeas we cultivate. - 4-6' Tall and Wide #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Hydrangea sikokiana Shikoku Mountain Hydrangea - Zone 6b - Part Shade - Japan

A remarkable species hydrangea that is rare in the literature and decidedly uncommon in gardens. Fuzzy, dark green leaves with a jagged edge frame white lacecap flower heads bearing copious stamens that give the flower caps a plush, almost furred appearance. Culturally plants are expected to be marginally cold hardy in Zone 6 climate though we feel they're worth a shot. As with many members of the genus we expect best success to occur with ample soil fertility and consistent moisture in the garden. We're a fan of this sophisticated plant and feel that it will combine nicely with many members of the woodland garden adding a beautifully textural garden presence. - 5-6' Tall and Wide

(Hybrid) - An unconfirmed yet probable interspecific hybrid between the shikoku mountain hydrangea and the panicle hydrangea (*Hydrangea paniculata*). Though the pedigree is foggy we find the plants to be distinctive and certainly high on the rarity list. The textured leaves are deep green with irregular heavily serrated edging. A complement of white, lacecap flowers add contrast during the summer months. Plants should be expected to be on the edge of cold hardiness for the region yet are likely a touch more cold tolerant than the straight species. - 5-6' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

NEW Hydrangea x versicolor Versicolor Hybrid Hydrangea - Zone 6b - Part Shade - Garden Hybrid

A confusing, long recognized yet rarely cultivated interspecific hybrid that was initially introduced to western horticulture from Japan in the mid 1800's by famed plant explorer Robert Fortune. Initially the plant was thought to be an intergeneric hybrid between the genera *Dichroa* and *Hydrangea* but recent botanical reclassification has demonstrated that the proper identity is as listed here. Regardless of the botanical naming debate the plant is worthy of a place in the garden, offering a distinct and unique flare. The low, mounded shrubs offer green, semi-evergreen leaves touched with a bit of gloss that remains attractive through the growing season and take on a burgundy overcast in cool weather. In summer, sky blue star-shaped flowers stand above the foliage providing unexpected contrast and a unique look for the genus. The literature indicates that plants can reach as much as 6' in height though our experience suggests that a smaller stature is more common. Ultimate cold hardiness is largely still untested though we've seen plants performing nicely in Zone 7 conditions and expect that they have the ability to stretch into colder zones with protection from late spring frosts and wind exposure. - 3-5' Tall and Wide #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Hypericum frondosum Golden St. John's Wort - Zone 5 - Full Sun - Southeastern North America

In the heat of midsummer, golden St. John's wort brings masses of 1.5-2" yellow flowers with fuzzy centers to the garden. Blooms are irresistible to pollinators and humans alike as they stand out starkly against the blue-green leaves. During dormant months these shrubs show off rich brown exfoliating bark and persistent fruit that adds a worthy unexpected dimension. Plants are rounded and dense in habit making them an attractive option for foundation plantings, hedging, or massing. A southern US native, *H. frondosum* is semi-evergreen in the south but deciduous up north and will thrive in full sun or high dappled shade as long as they have good drainage and evenly moist soil. - 3-4' Tall and Wide

'**Sunburst**' - An unassuming, small-stature shrub with impeccable, blue-cast foliage. Abundant, large, buttercup-yellow flowers appear in July and sporadically throughout the remainder of the summer months. Grows problem free in dry soils in full sun and is a welcome addition to the shrub border. - 3-4' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Ilex verticillata Winterberry Holly - Zone 3 - Full Sun - Eastern and Central North America

Surely, few native plants provide a more brilliant fall fruit display than the winterberry hollies. This delightful group of multi-stemmed, deciduous shrubs shine when the glowing red fruit ripen in September and frequently persist into the new year or until the birds devour them. Easy to cultivate, they flourish in both wet and dry sites alike. Both male and female plants are required for fruit production. - 6-15' Tall and Wide

'**Jim Dandy**' - The standard early-flowering male selection offering abundant and reliable blooms. A good pollinator for 'Chrysocarpa', 'Kennebago', 'Red Sprite', 'Roberta Case' and 'Sunsplash'. - 6-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'**Red Sprite**' - A compact form with masses of large, marble-sized, bright red fruit. The fruit quality has consistently ranked high in both quantity and size in several notable research publications comparing these qualities with other selections. An excellent choice for small gardens. Pollinated by 'Jim Dandy'. - 4-5' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'**Roberta Case**' - Looking for something to jazz up autumn? Why not try this new golden-yellow fruited winterberry holly? 'Roberta Case' is touted as the biggest and brightest selection in its class. If it lives up to the hype we expect she'll become quite the plant to cheer up the end of the gardening season. Plants show standard growth and will reach 8' when mature. Pollinated by 'Jim Dandy'. - 6-10' Tall and Wide

#2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 • #7 \$89.99 (July) • Assorted Specimens Individually Priced

'**Southern Gentleman**' - A valuable male pollinator for late blooming varieties such as 'Winter Gold' and 'Winter Red'. - 6-10' Tall and Wide #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'**Sunsplash**' - Our striking variegated introduction that offers bright, gold-splashed foliage and respectable crops of orange-red fruit. The foliage quality offers a wonderful extension to the ornamental display of this noteworthy species. Discovered by our friend John Dancher. We think it's a gem! Pollinated by 'Jim Dandy'. - 6-8' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'**Winter Gold**' - A showy sport of 'Winter Red' distinguished by the unique, apricot-orange fruit that decorate the branches in late fall and early winter. Our specimens are consistently spectacular and always elicit the "what's that" comment from customers. Pollinated by 'Southern Gentleman'. - 6-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

'**Winter Red**' - A highly prolific fruit producer with brilliant red fruit that illuminate the landscape well into January. Plants are large growers and among the finest for cut branches and holiday decorations. Introduced by Simpson Nursery. Pollinated by 'Southern Gentleman'. - 6-10' Tall and Wide #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

Indigofera decora f. alba White Flowered Chinese Indigo - Zone 5 - Full Sun - China, Japan

A white flowered form of Chinese indigo that we've become quite enamored with over the years. The compact shrubs develop upright twigs to 2' tall which support 8" arching clusters of pure white, pea-like blossoms in early summer. Fresh green, pinnately compound leaves add textural contrast to the colonizing framework. Plants are easily cultivated in open exposure where they demonstrate durability and tolerance to drought and low fertility. - 1-2' Tall, 4-5' Wide - #2 \$34.99 • #3 \$49.99 (July)

Indigofera kirilowii Chinese Indigo - Zone 5 - Full Sun - China, Japan, Korea

A refined Chinese native pea relative developing an upright framework graced with texturally attractive blue-green pinnate leaves. In late spring, an abundance of rich pink flowers, held in 6" pendulous clusters begin to develop and continue to flower in succession through much of early summer. Plants are durable in the garden showing tolerance of infertile, dry conditions though best performance will certainly occur in high quality soil with good sun exposure. An excellent addition for use in mixed borders in combination with both herbaceous perennials and shrubs. - 3-4' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Indigofera x 'Little Pinkie' Little Pinkie Hybrid Indigo - Zone 6 - Full Sun- Garden Hybrid

An easy going and attractive rounded shrub cloaked with small deep green compound leaves set off by abundant 3" spikes of bright pink flowers in summer. Excellent plant for the front of the sun drenched border or other small garden space. Thought to be a hybrid between *Indigofera amblyantha* and *I. pseudotinctoria* 'Rose Carpet'. - 3-5' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Itea virginica Virginia Sweetpire - Zone 5 - Full Sun-Shade - Eastern North America

A handsome species native to low-lying regions of the eastern United States. Valued for its faintly fragrant chains of drooping white flowers and its intense, wine-red and scarlet fall color. - 4' Tall, 6' Wide

'**Henry's Garnet**' - A graceful selection of Virginia sweetpire showcasing 2-6" flower racemes along broadly arching stems. Excellent red-purple fall color. - 4' Tall and Wide - #2 \$34.99 • #3 \$49.99

'**Sprich**' - A compact sweetpire with outstanding wine-red fall color. Useful in many landscape situations. - 3-4' Tall and Wide - #2 \$34.99 • #3 \$49.99

Kolkwitzia amabilis Beautybush - Zone 4 - Full Sun - China

A classic shrub with a long history of cultivation. Brought from the wilds of China to horticulture by the great plant explorer E.H. Wilson who considered it to be amongst his finest introductions. The large shrubs are best known for spring's dazzling display of 1/2" pink bell-shaped flowers that blanket the arching framework. Easily cultivated plants show the best performance in sunny exposures and average garden soil. - 10-15' Tall and Wide

'**Maradco**' - A spectacular beautybush offering showy, golden-yellow foliage and gold-orange fall color. Masses of soft pink flowers in early spring complete the package. Plants are vigorous and hold up well in full sun. - 6-8' Tall and Wide - #2 \$34.99 (July)

Leptodermis oblonga Leptodermis - Zone 5 - Full Sun - China

A charming, low mounding, deer resistant shrub only recently introduced to the nursery industry. Plants flaunt a delightful display of tiny lilac purple flowers from late spring until first frost. Grows best in full sun in any average garden soil and is easily tucked into the mixed border or open garden corner. - 2-3' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Lespedeza bicolor Bush Clover - Zone 5 - Full Sun - Japan

A fine semi-woody shrub native to Japan where its arching stems can reach 6-8' tall. Plants cloak themselves with attractive pink to purple flowers in late summer. Flowers are set off by attractive, greenish-blue, trifoliate leaves. Plants are tough as nails showing excellent performance on droughty, well-drained, poor quality soils. As an added bonus they fix nitrogen, improving the quality of the soil as they grow. Although not a problem in our region, this species has shown some invasive tendencies further south where the longer growing season allows plants to develop mature seed. - 6-8' Tall and Wide

'**Yakushima**' - A dainty, dwarf-mounding selection of bush clover that develops masses of elegant, lilac-purple, pea-like blossoms in late summer. Flowers provide the perfect foil for the refined, fresh-green foliage. A welcome addition to the border front or sun-drenched perennial garden. - 2' Tall, 4' Wide #2 \$34.99 • #3 \$49.99 (July)

Lespedeza thunbergii Bush Clover - Zone 5 - Full Sun - China, Japan

A fine-textured, arching shrub cloaked with blue-green foliage and rosy-purple flowers in late summer and autumn. A first rate shrub for late season interest and certainly should be integrated into gardens more extensively. Plants perform happily in any average garden soil in full sun. - 5' Tall, 7' Wide

'Edo Shibori' - A striking form of bush clover with two-toned rose and white flowers that cover the arching stems in late summer and autumn. - 5' Tall, 7' Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Gibraltar' - The most common selection, offering drooping branches that are smothered with hundreds of purple-lavender flowers in summer and fall. You won't be able to resist it when you see it in bloom! - 5' Tall, 7' Wide - #2 \$34.99 • #3 \$49.99 (July)

'Spilt Milk' - A high glamour, strong growing selection of Japanese bush clover that we find exceptional for its sparkling trifoliate leaves that combine a background of deep green with a prominent patchwork of cream and white streaks and flecking. The coloration certainly extends the season of interest for this species but also provides the perfect complement to summer's rich purple pea-like blossoms. Best utilized in sunny exposures in all but water-logged soils. - 5' Tall, 7' Wide - #2 \$34.99 (July)

Ligustrum sinense Chinese Privet - Zone 6 - Full Sun-Part Shade - China

A species of privet native throughout much of Asia including regions in China, Taiwan and Vietnam where the seeds are harvested for use in soap making. Plants are very similar to other privet species in general appearance and landscape utility. The opposite, thumb-sized leaves are held on the thin, wiry stems and are rich green in color. Masses of fragrant, creamy white flowers are born in spring and mature to crops of rounded blue-black fruit. Plants are easy to cultivate, showing tolerance to a range of soil and light conditions. - 8-12' Tall

'Swift Creek' - A semi-evergreen privet that has captivated our attention with its brilliant creamy-white variegated leaves. The strong growing plants offer the resilience of a privet with year round style. Though impressive at other times of the year we find 'Swift Creek' to be an all-star in the late summer and fall garden. The 8' shrubs offer visual inspiration during the dog days of summer as well as a touch of panache during the build up to the holiday season. Full sun or part shade coupled with average garden soil create a prime environment for optimal success. - 8-12' Tall

Assorted Specimens Individually Priced

Lindera angustifolia Asian Spicebush - Zone 6 - Full Sun-Part Shade - China, Japan

A large, dioecious shrub from Asia reaching 8-10' in height at maturity. Offers glossy, bright green, slender leaves that remain clean and attractive throughout the growing season. In fall, the foliage turns brilliant shades of orange, coral and red. Fall color is retained for an extended period and is hard to beat at this time of year. Following the autumn display the tan, dried foliage persists into winter providing added color on cold snowy days. - 8-10' Tall and Wide

#5 \$69.99 • #7 \$99.99 (July) • Assorted Specimens Individually Priced

Lindera benzoin Common Spicebush - Zone 4 - Full Sun-Shade - Eastern and Central North America

A handsome, native, deciduous shrub which receives its common name from the unique, spicy fragrance of the twigs and leaves. Plants are typically found in shaded, wet areas throughout eastern North America. In early spring, the leafless branches are clothed with a wonderful display of greenish-yellow flowers. On female plants, marble-sized red fruit create a wonderful complement to the butter-yellow fall color. Great for naturalizing. - 6-10' Tall and Wide

#2 \$34.99 (July) • #3 \$49.99 (July)

NEW **Lonicera standishii Standish Honeysuckle - Zone 5 - Full Sun - China**

A charming deciduous shrub valued for its abundant, deliciously fragrant, creamy-white flowers that bless the garden in late winter. Glossy, dark green leaves are semi-evergreen in the south and provide an excellent contrast element during the growing season. Adaptable to many locations, plants perform admirably in hedges, screens or the shrub border. Forced branches also make an attractive addition to the kitchen table during the winter months. - 8-10' Tall and Wide -

#2 \$34.99 (July) • #3 \$49.99 (July)

Myrica pensylvanica Northern Bayberry - Zone 3 - Full Sun - Eastern North America

A fine, semi-deciduous shrub native to coastal regions throughout eastern North America. The rich green foliage is wonderfully scented when crushed and looks handsome throughout the growing season. Female plants display profuse, powder blue, waxy fruit in autumn which remain effective through April. A top performer in many garden environments including those with high salt levels and poor fertility. - 6-10' Tall and Wide

NEW (Male Clone) - An attractive male selection of bayberry propagated from cuttings. Excellent foliage quality and a valuable pollinator for female cultivars. - 6-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 • #7 \$89.99 (July) • **Assorted Specimens Individually Priced**

'Pilgrim Lady' - A uncommon female clone of northern bayberry that we were excited to come across and are primed to learn more about this coming year. Though we're not totally familiar with all the qualities that make this stand out, we do know that it is a cloned female selection of this fine northeast US native! We'll be overjoyed to be able to say "yes" when customers ask if we have any sexed plants stocked! - 6-10' Tall and Wide (Guess)

#2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Niellia sinensis Chinese Niellia - Zone 5 - Full Sun-Part Shade - China, Korea

A charming, small, multi-stemmed shrub rarely cultivated in the United States. In May, plants develop numerous 2-3" racemes of soft pink flowers along arching branches. The flowers are a good companion to the rich green pest-free foliage and peeling stems. Plants perform admirably in well-drained soil and fit easily into any open garden corner. - 4-6' Tall and Wide - #2 \$34.99 (July) • #5 \$59.99 (July)

Orixa japonica Japanese Orixa - Zone 5 - Full Sun-Part Shade - Japan

A rare deciduous shrub with glossy, dark green, aromatic foliage that takes on attractive yellow tones in autumn. Excellent for hedging or for use as a contrast plant. - 5-10' Tall and Wide

'Pearl Frost' - An extremely rare cultivar of an extremely rare species. This first class shrub offers breathtaking, creamy-white edged and streaked foliage. The coloration is among the most dramatic we've seen in the world of variegation. Plants are easy growers when cultivated in any reasonable garden soil and the leaves are surprisingly scorch resistant in all but the driest of dry. Excellent for accent in the shrub border and certainly a good conversation piece for showing off to your plant geek friends. - 5-7' Tall and Wide - #2 \$34.99 • **Assorted Specimens Individually Priced**

Philadelphus x lemoinei Mockorange - Zone 4 - Full Sun - Garden Hybrid

A hybrid group of mockorange created by interbreeding Philadelphus microphyllus and P. coronarius. Plants are known to develop into graceful cascades of branches decorated in early summer with clouds of sweetly-fragrant creamy-white flowers. Though Philadelphus has a reputation for being somewhat ho-hum we'd encourage you to explore the exciting cultivars now on the market that offer extended interest. - 8-12' Tall

'Innocence' - Unique, cream-white variegated foliage, especially on vigorous shoots. One of the most fragrant of all the cultivars. Most customers can't help themselves when plants are in bloom. - 6-8' Tall - #2 \$34.99 (July) • #3 \$49.99 (July)

Physocarpus opulifolius Ninebark - Zone 2 - Full Sun - Northeastern and Central North America

A tough, upright-arching, native deciduous shrub that develops a dense, rounded form in time. Plants are very cold hardy and will flourish in some of the toughest growing conditions. In May and June the branches are laden with 1-2" white to pink flower clusters. - 8-12' Tall and Wide

'Fire and Brimstone' - A smoking hot cultivar featuring foliage that emerges bronze but darkens over the growing season to be virtually black. The expected pinkish-white flowers give way to shocking, flame red seed heads that stand out vividly against the foliage. More sun means darker foliage, so site in full sun for best results. - 8-12' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Little Angel' - A shapely, compact clone of ninebark boasting dense branches cloaked with rich burgundy and orange cast foliage. In summer, plants are crowned with rounded white flower clusters which stand out spectacularly against the foliar backdrop. An excellent plant to bulk up your season long display. - 3-4' Tall and Wide - #2 \$34.99 (July)

Platycrater arguta Tea of Heaven - Zone 6 - Part Shade-Shade - Southern Japan, Eastern China

A decidedly rare, woodland hydrangea family member deserving of broader landscape consideration. The deciduous shrubs boast unique blossoms that emerge from rounded, balloon-like buds. Each flower is about an inch wide and comprised of 4 reflexed white petal-like bracts embossed with a prominent cluster of rich yellow stamens. Medium green, lance-shaped leaves up to 6" long adorn the stems of the mounded plants. Yet another treasure for savvy gardeners to integrate into the shade garden. A recent look at the genus by plant taxonomists has proposed a realignment of the botanical classification; if adopted the new botanical name for this fine plant will be *Hydrangea platyarguta*. - 2-3' Tall and Wide

'Rosea' - For those who feel the straight species isn't sufficiently rare, give 'Rosea' a try. Plants are similar to the straight species in all qualities with the exception of delicate shell pink flowers. - 2-3' Tall and Wide - #2 \$34.99 • #3 \$49.99

Poncirus trifoliata Hardy Orange - Zone 5 - Full Sun - China, Korea

A funky, cold hardy citrus cousin sure to stir up interest in the garden. The deciduous, irregularly branched shrubs are comprised of deep green twisted and contorted stems that support three-lobed leaves and cool thorns of similar coloration. White, apple blossom-like flowers contrast brilliantly with the stem structure and emit a sweet fragrance sufficient to heighten the senses. Golf ball-sized yellowish oranges provide added fun in autumn. Though quite bitter when fresh, they are quite tasty when used in marmalade. Of course, everything is tasty with a bit of sugar! Plants are easy to cultivate in open, sunny exposures and can serve as specimens or can be sculpted for hedging use. - 6-10' Tall and Wide

'Flying Dragon' - The remarkable 'Flying Dragon' offers all the qualities of the straight species, just more! Stems are twisted and curled to the extreme and as a result become quite sculpted and architectural. Plants stay more compact and are certain to command attention when sited prominently. - 6-8' Tall and Wide - #3 \$49.99 • #5 \$69.99 (July)

Prunus maritima Beach Plum - Zone 3 - Full Sun - Northeastern North America

A noteworthy, suckering, deciduous shrub native to rocky, well-drained coastal regions from New Brunswick to Virginia. The white flowers appear in May and are followed by clusters of 1" dull-purple plums. Fruit ripen in August and are frequently used in jams and jellies. The fruit is also an important food source for numerous wildlife species. Plants are easy to grow and are valued for their adaptability to dry sites and high salt levels. - 6-12' Tall and Wide

'Orange Marmalade' - An exciting 2017 Broken Arrow Nursery introduction that represents one of the first clonal selections of beach plum on the market. 'Orange Marmalade' has been a standout in our trials demonstrating exceptional vigor with the capacity to reach 8-12' in height. Plants showcase abundant white flowers in spring which mature into unique orange fruit in late summer. Though orange fruiting plants are occasionally found in the wild, the fruit of this selection is larger than average, consistent and flavorful. Plants retain the durability and adaptability of the straight species standing up to the rigors of coastal living with little care. Though plants are self-fruitful, enhanced crops will develop with cross pollination from other beach plums. - 8-12' Tall and Wide - #2 \$39.99 • #3 \$59.99 (July)

Prunus pumila Sand Cherry - Zone 3 - Full Sun - Northeast and North Central North America

A widespread North American native that colonizes open spaces such as steep slopes, sand dunes, roadsides, and prairies via horizontally spreading, suckering branches. Dense clusters of white flowers crowd along the branches in spring and draw in swarms of pollinating insects, while the subsequent purple-black berries are favorites of wildlife and humans alike and have long been used for jams, jellies, and other sweet treats. Fall colors range from red to orange with flickers of yellow, making this a truly indispensable shrub for both ornamental use and durability. - 2' Tall and 5' Wide

'Gus Melquist' - A prostrate, spreading shrub that showcases fresh green leaves along a rambling, sprawling branch pattern. In summer, a highlight of pure white flowers adds seasonal appeal. Flowers mature to dark red cherries that are important forage for many animal species. In autumn, scarlet fall color is the norm. Plants are disease resistant, underutilized and easily cultivated provided that they are sited with sunny exposure and reasonable drainage. Excellent as an unexpected groundcover or edger. - 2' Tall and 5' Wide - #2 \$34.99 • #3 \$49.99 (July)

Rhamnus frangula Glossy Buckthorn - Zone 3 - Full Sun-Part Shade - Europe

Glossy buckthorn is an undesirable, invasive plant native to regions in Europe. The plants are largely weedy and of little garden interest. Fortunately, the following, non-invasive cultivar is available. - 10-15' Tall and Wide

'Ron Williams' - A recent introduction that combines the airy textured leaves of *R. frangula* 'Asplenifolia' with the columnar habit of *R. frangula* 'Columnaris'. The result is a unique shrub suited to any number of tight spots in the landscape. - 10' Tall, 2' Wide
#2 \$34.99 (July) • #3 \$59.99 • #5 \$79.99 • #7 \$99.99 (July)

Rhododendron arborescens Sweet Azalea - Zone 4 - Full Sun-Part Shade - Eastern North America

A vigorous native azalea that typically develops into a loose branched upright shrub. Plants have lustrous dark green leaves and white to light pink fragrant flowers. - 6' Tall and Wide

'White Lightning' - A large, white flowered clone with exceptional fragrance. Develops a dense, compact habit. Selected by our good friend Clarence Towe. - 4' Tall and Wide - #2 \$39.99 • #3 \$59.99 (July)

Rhododendron atlanticum Coastal Azalea - Zone 6 - Full Sun-Part Shade - Eastern North America

A delicate, deciduous azalea native to the coastal plain of the eastern United States where it thrives in the shaded sandy pinelands and other low lying ecosystems of the region. Plants form lightly branched stoloniferous colonies that average 4-5' in height and can extend for several acres under ideal conditions. That said, spread is often much more restricted under cultivation with plants generally developing into clumps only slightly broader than tall. Tubular, white or pale pink flowers are born in clusters of 4-10 and begin to appear in spring just as the blue-green foliage is starting to emerge. Each blossom emits a sweet, heavy perfume that draws in any nose that passes by. Plants perform happily in rich, evenly moist soil and are more adaptable to wet areas than most azaleas. - 4-5' Tall and Wide

f. polypetala - An unusual form of coastal azalea boasting fragrant, white and pale pink flowers that are divided into lacy, strap-like petals rather than the typical fused corolla. The overall effect is a unique floral display that is sure to attract attention. Much like the straight species, this particular clone displays a low, mounded habit with excellent blue cast foliage and some stoloniferous tendency. - 4-5' Tall and Wide - **Assorted Specimens Individually Priced**

Rhododendron mucronulatum Korean Rhododendron - Zone 4 - Full Sun-Part Shade - China, Japan, Korea, Manchuria

A wonderful, hardy rhododendron native to China, Manchuria, Korea and northern Japan. Represents the first rhododendron or azalea to bloom in spring with its 1.5" bright lavender-pink flowers. Develops into a small rounded shrub. - 5-6' Tall and Wide

'Cornell Pink' - A classic selection with striking bright pink flowers. Hard to resist when seen first hand. Often develops attractive maroon leaf coloration in fall. - 5-6' Tall and Wide - #2 \$39.99 • #3 \$59.99 (July)

Rhododendron schlippenbachii Royal Azalea - Zone 4 - Full Sun-Part Shade - Korea, Manchuria, Russia

Considered by many to be the most beautiful of the deciduous azaleas. As Dr. Michael Dirr notes, there is "no adequate way to do justice to the beauty of this plant by the written word". Develops a spectacular display of large, soft-pink flowers in May just as the foliage is emerging. Uniquely shaped foliage turns shades of yellow, orange and burgundy in fall. - 6-8' Tall and Wide - **Assorted Specimens Individually Priced**

Rhododendron viscosum Swamp Azalea - Zone 3 - Full Sun-Part Shade - Eastern North America

Another deciduous azalea native to the eastern United States. Showcases a wonderful display of tubular, clove-scented white flowers in June. Excellent lustrous green foliage. Habit is highly variable and is often open with numerous spreading branches. Plants show tolerance to moist soils. - 5-8' Tall and Wide
#2 \$39.99 • #3 \$59.99 (July)

Rhododendron x 'Cannon's Double' Cannon's Double Hybrid Rhododendron - Zone 5 - Full Sun-Part Shade - Garden Hybrid
Delicate double blossoms of pastel peach, apricot and cream against spring's bronze infused foliage sets 'Cannon's Double' apart from other deciduous azaleas. The long lived, rounded shrubs can be expected to reach 5-6' high and wide when mature. - 5-6' Tall and Wide - #3 \$59.99 • #5 \$79.99 (July)

Rhododendron x 'Coastal Flame' Coastal Flame Hybrid Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
Rhododendron x 'Coastal Flame' is a Broken Arrow Nursery selection that combines the coast azalea (*R. atlanticum*) and flame azalea (*R. calendulaceum*) into its pedigree. Our original plant is at least 50 years old and measures 6' high and 8' wide, a size one would rarely expect to see in gardens. Plants strut impressive, glossy leaves and an abundance of rich pink blossoms set off with an apricot flair. Always asked about when in bloom in late May each year. - 5' Tall, 6' Wide - Assorted Specimens Individually Priced

Rhododendron x 'Garden Rainbow' Garden Rainbow Hybrid Rhododendron - Zone 5 - Full Sun-Part Shade - Garden Hybrid
Cheery yellow flowers maturing to colorful shades of salmon, pink and orange add a striking appeal in June when on display. At times all colors will be present lending a multicolored quality that is a step apart from other deciduous azalea offerings. The upright plants are a pleasure to grow with foliage that stays clean and free from powdery mildew. - 5' Tall, 3' Wide - #2 \$39.99 • #3 \$59.99 (July)

Rhododendron x 'George Reynolds' George Reynolds Knap Hill Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
A Knap Hill deciduous azalea with large bright yellow flowers marked with a prominent orange blotch. Leaves emerge with bronzy overtones and take on rich purple tints in autumn. - 5' Tall, 7' Wide - #2 \$39.99 • #3 \$59.99 (July)

Rhododendron x 'Homebush' Homebush Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
A deciduous azalea introduced by Knap Hill Nursery. Develops a striking display of deep pink semi-double flowers in tight, ball-shaped trusses. - 6' Tall, 5' Wide - Assorted Specimens Individually Priced

Rhododendron x 'Marie Hoffman' Marie Hoffman Hybrid Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
An amazing fragrant deciduous azalea boasting large rich pink flowers. Truly impressive and always causes a stir when in bloom. - 5-6' Tall and Wide #2 \$39.99 • #3 \$59.99 (July)

Rhododendron x 'Narcissiflora' Narcissiflora Hybrid Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
A strong growing, upright selection that produces large trusses of double, light yellow flowers that begin to show themselves in late May. Flowers are highly fragrant with petals that are arranged in a "hose in hose" style. - 5-8' Tall and Wide - #2 \$39.99 • #3 \$59.99 • #5 \$79.99 (July)

Rhododendron x 'Ribbon Candy' Ribbon Candy Hybrid Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
Another amazing Weston Nurseries introduction! Plants have lightly curled, blue-green leaves and June adds a layer of spicy fragrant, star-shaped pink flowers with thick white stripes down the inside. - 5-8' Tall and Wide - #2 \$39.99 • #3 \$59.99 • #5 \$79.99 (July)

Rhododendron x 'Sea Breeze' Sea Breeze Hybrid Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
A fine Weston Nurseries introduction that first caught our attention for the distinctive and uniquely attractive blue-cast foliage, a quality we rarely expect from this group. A prize of pleasantly fragrant yellow blossoms emerge in late May or early June in Connecticut, adding to the overall value. - 5-8' Tall and Wide #2 \$39.99 • #3 \$59.99 (July)

Rhododendron x 'Weston's Innocence' Weston's Innocence Hybrid Azalea - Zone 5 - Full Sun-Part Shade - Garden Hybrid
One of our favorite hybrids that fills the garden with a lovely perfume as the abundant, white, tube-shaped flowers open in early summer. The blossoms are set off by glossy, disease-free foliage that covers the vigorous, spreading plants. - 5-6' Tall and Wide - #2 \$39.99 • #3 \$59.99 (July)

Rhodotypos scandens Black Jetbead - Zone 5 - Full Sun-Shade - China, Japan
Black jetbead is a durable yet seldom encountered small deciduous shrub native to Japan and central China. Many large 1-2" white flowers appear from the arching twigs throughout May and June. Flowers are followed by clusters of black, bead-like fruit at branch end. Displays excellent adaptability to nearly all growing conditions including dry shade and soils with poor fertility. Plants will never steal the show but are certainly a welcome companion plant or addition to that garden corner. - 5-6' Tall and Wide - Assorted Specimens Individually Priced

Rhus aromatica Fragrant Sumac - Zone 3 - Full Sun-Part Shade - Eastern North America
An irregular, spreading deciduous shrub. Foliage is medium to dark green and transforms to brilliant shades of scarlet, orange and burgundy in autumn. Female plants bear groups of unique, bright red, fuzzy fruits that remain effective for several weeks in the fall. A durable plant that shows exceptional drought tolerance and adaptability to a range of growing conditions including dry sites and infertile areas. - 2-6' Tall and Wide
'Fine Textured Compact Select A' - PP 28669 - A cool new introduction from plantsman Mike Yanny! Very small, finely dissected leaves offer a uniquely lacy texture on a neatly mounded frame, and brilliant red fall color gives a cheerful, confetti quality to the landscape. - 4' Tall, 6' Wide #2 \$34.99 • #3 \$49.99

'Gro-Low' - A low, wide-spreading sumac that acts more like a groundcover than a shrub. Excellent, glossy green foliage and brilliant, orange-red fall color. - 2' Tall, 6' Wide - #1 \$24.99 • #2 \$34.99 • #3 \$49.99

Rhus coppalina Flameleaf Sumac - Zone 4 - Full Sun - Eastern North America
A large deciduous shrub or small tree that is frequently encountered on disturbed sites in eastern North America. Plants have a suckering nature forming colonies of crooked and sculpted stems some 15-20' tall. Twigs are cloaked with lustrous dark green leaves that take on rich scarlet and crimson tones in autumn. Upright, 4-8" clusters of greenish-yellow flowers play off the foliage during the late summer months. Plants are best utilized in large landscapes where they perform admirably in infertile, rocky, drought prone soils. Great for massing, bank stabilization or naturalistic plantings. - 10-20' Tall and Wide
'Lanham's Purple' - An impressive clone of flameleaf sumac that we finally acquired after numerous years of searching. Foliage emerges rich burgundy-purple in spring holding its color throughout the season. Like the species, brilliant scarlet-red tones dominate in fall. Discovered by the late, great plantsman Gary Lanham of Lebanon, KY. - 8-15' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Rhus typhina Staghorn Sumac - Zone 4 - Full Sun - Eastern North America
Another tough, native, suckering shrub frequently encountered along roadsides and other edge habitats in eastern North America. Exhibits bright green foliage which transforms to scarlet, orange and yellow in fall. Female plants bear a wonderful display of unique, brick-red, hairy fruit in early fall. The fruit display often remains effective well into the winter months. Plants sucker freely from underground stems making them ideal candidates for massing or naturalizing. Additionally, they are quick to establish and will tolerate well-drained soil in full sun. - 10-20' Tall and Wide
'Bailtiger' - PP 16185 - An exciting selection from Bailey Nursery with vivid chartreuse-yellow foliage that contrasts brilliantly with the coarse-textured, fuzzy stems. The leaf color holds up well throughout the growing season turning intense orange, yellow and scarlet in autumn. Plants are smaller and more manageable than the species reaching only 6' tall. A worthwhile alternative to the invasive gold leaf barberry selections. - 6' Tall, 10' Wide - #3 \$49.99 • #5 \$69.99 • #7 \$89.99 (July)

Rosa glauca Redleaf Rose - Zone 3 - Full Sun - Central and Southern Europe

Hands down our favorite rose for foliage effect with its outstanding smoky-purple leaves. Delicate, soft pink single flowers and dark maroon hips complement the foliage throughout the season. Dark purple stems add interest during the winter months. - 6' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Rostrincola dependens Rostrincola - Zone 6b - Full Sun - China

An amazing and unique sub-shrub with a magical appearance that looks like something that would grace the woodlands of Avatar! The 4' plants display arching stems cloaked with butterfly-bush-like narrow, mid-green leaves. In late summer, enchanting 4-6" lax racemes comprised of lilac-pink flowers emerge adding allure to the garden at just the right time. Collected in Guizho Province, China by the Sino-British expedition. - 4-5' Tall and Wide #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

Rubus cockburnianus Ghost Bramble - Zone 5 - Full Sun - China

A vigorous ornamental raspberry boasting delicate, dissected, blue-green, fern-like leaves along fountain-like, barbed stems. Small purple flowers provide a subtle display in summer. The grand spectacle comes in winter when the waxy white, arching canes stand in stark contrast to the somber colors of the dormant garden. Plants are easy to cultivate performing well in average garden soils in sun drenched exposures. Annual pollarding is recommended to maintain tidy form and encourage the best winter stem display. - 4' Tall, 6' Wide

'Razzle Dazzle' - A recent Broken Arrow Nursery introduction that boasts showy pink, cream and gold mottled foliage that illuminates the garden throughout the growing season. The coloration is intricate, eye-catching and resistant to sun scald and scorch making it a valuable addition to the shrub border or prime garden position. Like the species, breathtaking, ghostly white dormant canes enliven and excite the winter landscape. Easy to cultivate, 'Razzle Dazzle' is happy in any sunny exposure that has reasonable soil drainage. - 4' Tall, 6' Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Rubus pentalobus Creeping Raspberry - Zone 6 - Full Sun-Part Shade - Taiwan

An easy to grow, semi-evergreen species that develops a ground hugging habit of robust stems cloaked with thick, rounded leaves. In summer, plants display single, five-petaled white flowers which stand in stark contrast to the deep green, heavy textured greenery. Although uncommon, orange-red, raspberry-like fruit are produced in late summer and are cherished by scavenging wildlife. Optimum growth occurs in full sun or bright shade in average garden soils. Some protection from drying winter winds is advisable in our region. Plants make wonderful groundcovers adding a fresh textural mix to a diversity of plantings. - Groundcover - #2 \$34.99 • #3 \$49.99 (July)

'Sonya's Parasol' - A fantastic variegated selection of creeping raspberry that we've been most impressed with. Plants boast deep green, semi-evergreen leaves prominently highlighted with streaks and swirls of bright pink and cream coloration. We utilize this plant in the garden as a small-scale groundcover and find that it is equally happy in full sun or part shade exposures. Would also make a superb edger or interesting container subject. - Groundcover #2 \$34.99 • #3 \$49.99 (July)

Rubus tricolor Creeping Bramble - Zone 6 - Full Sun-Part Shade - China

A semi-evergreen bramble boasting glossy, deep green, three-lobed leaves held on low, rambling stems. White flowers are produced in early summer followed by crops of edible red fruit later in the season. Plants are tough as nails showing strong tolerance to a range of light conditions and making suitable groundcovers in all but wet soils. May prove to be one of the most attractive options out there for dry shade or difficult sloping banks among other tricky garden corners! - 1' Tall, 8' Wide - #2 \$34.99 • #3 \$49.99 (July)

Salix areneria Silver Creeping Willow - Zone 4 - Full Sun - Europe

A choice willow that develops a low mounding form of finely textured, felted, silver-gray leaves. Plants prefer moist locations in full sun and make ideal contrast elements at the front of a border or at the edge of a pond. - 2-3' Tall, 4' Wide - #2 \$34.99

Salix babylonica Babylon Weeping Willow - Zone 5 - Full Sun - China

A strong growing willow that commonly reaches 30-40' in height. Lance-shaped leaves are blue-green in color with a waxy-silver reverse. Each leaf is held along graceful, high gloss twigs that create an elegant sweeping stem structure. Full sun is the rule as is true with most members of the genus. - 30-50' Tall

'Crispa' - One of the most unique and uncommon willows you'll see! This choice oddity showcases amazing foliage that is curled and spiraled into a curious shape that closely resembles a ram's horn. Collectors won't be able to live without it and landscape designers will be intrigued by its unusual texture and irresistible statement. Plants are quite vigorous and will mature 30' tall in time. That said, a good workout with your pruning implement of choice will keep it just about any size desired. - 30' Tall - #2 \$34.99 (July) • #3 \$49.99 • #7 \$79.99 • Assorted Specimens Individually Priced

Salix candida Dwarf Hoary Willow - Zone 3 - Full Sun - Northern North America

One of the common names for this shrub is "hoary willow" and the reason is obvious since the silvery-white hairs coating the stems and undersides of the dark green leaves make the plants seem touched by frost year-round. Early spring brings masses of fuzzy bottlebrush catkins lining the stems, and the leaves are often retained long into the winter, adding some interest to otherwise barren landscapes. Native to bogs and wetlands of the northern United States and southern Canada, *Salix candida* prefers consistently moist soil and full sun. - 5-10' Tall and Wide

'Jefberg' - A choice willow that showcases impeccable silver leaves on a compact-rounded framework of dense branching. In spring, whitish-gray catkins marked with pinkish-red anthers add delicate appeal. The superbly cold hardy plants are excellent as filler plants or to bulk up the contrast in mixed borders. Discovered by the Memorial University of Newfoundland and Labrador Botanical Garden. - 5' Tall and Wide - #2 \$34.99 • #3 \$49.99

Salix caprea Pussy Willow - Zone 4 - Full Sun - Europe, Northeast Asia

A large, erect shrub valued for its soft, silky-gray male catkins which appear in March and April. These familiar "pussy willows" are a favorite of children and one of the first harbingers of spring. - 15-20' Tall

'Ogon' - An alluring introduction with flamboyant, golden-yellow foliage in spring and early summer. Makes a superb cutback shrub or strong statement in the shrub border. We're certainly one of the only sources in the country for this exciting willow. - 15-20' Tall - #2 \$34.99 • #3 \$49.99 (July)

Salix elaeagnos f. angustifolia Rosemary Willow - Zone 4 - Full Sun - Central and Southern Europe, Asia Minor

Among the finest of all willows for foliage color and textural contrast. The vigorous plants flaunt silky, pewter-gray, ribbon-like leaves along wispy, bronze-blushed stems. Performs admirably in both wet and dry soils in full sun and shows excellent resistance to the willow leaf beetle. Plants are most commonly used as a contrast element or backdrop for other shrubs and perennials but would also be suitable for use as an informal hedge. - 10-15' Tall and Wide #3 \$49.99 • #5 \$59.99 (July)

Salix gracilistyla Rosegold Willow - Zone 4 - Full Sun - China, Japan, Korea, Manchuria

A long cultivated and largely misclassified shrubby willow. Recent work led by UConn's Dr. Kuzovkina has added much clarity to this valuable species and its affiliations. To a large extent many willows formerly classified as *Salix chaenomeloides* are more accurately identified as selections of *S. gracilistyla* or hybrids with this species in its pedigree. All are cultivated for their strong growth, graceful framework of dense, arching stems and dazzling late winter display of catkins. In addition, they are valuable plants for pollinators due to their unique, late winter bloom period. The straight species offers multicolored catkins of black, red and pale green though several cultivars have been selected for different coloration. - 6-10' Tall and Wide

'Melanostachys' - A male selection with curious, coarse branches that is infrequently encountered in the garden. Offers enchanting, deep reddish-purple to black catkins with maroon-red anthers in late winter or early spring. A very unique and curious shrub that we think is great for early season interest. Awarded the 2012 U.K. Award of Garden Merit for outstanding ornamental value and garden performance. - 6-10' Tall and Wide #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Mt. Aso' - Magic to behold in spring when the glowing, rich-pink, felted catkins emerge from winter's rest. The vigorous, 10-15' male shrubs provide ample display in the garden and are equally impressive when used for cut branches. Attractive, blue-cast foliage adds color and presence to the landscape during the remainder of the growing season. This plant was previously thought to be a selection of *Salix chaenomeloides* but is more correctly listed as a selection of *S. gracilistyla*. - 10-15' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Salix integra Japanese Willow - Zone 4 - Full Sun - China, Japan, Korea

A small tree or large shrub known to the horticulture world almost exclusively through the variegated selection 'Hakuro Nishiki'. The straight species is native to Japan and offers a graceful habit and slightly drooping branches at maturity. - 10-15' Tall and Wide

'Hakuro Nishiki' - An eye-catching, moderate-sized, multi-stemmed shrub willow with new shoots that display striking pink and white-mottled foliage. Plants should be cut back in late winter to promote vigorous new growth in spring. A favorite! - 10-15' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Salix myrsinifolia Myrsine Leaved Willow - Zone 4 - Full Sun - Eastern Europe

An uncommonly cultivated willow species which hails from the shores, swamps and field margins of European boreal regions. Plants emphasize oval, kidney bean shaped leaves of hunter green above and waxy silvery-green beneath. The mid-sized shrubs offer slender, glossy twigs that transition from green during the growing season to reddish-brown in winter. Loose, fuzzy seed structures provide conversation value during spring. - 8-15' Tall and Wide

'Blackskin' - An excellent selection that adds much value to the dormant garden with its show of high gloss, sultry black stems. Nearly rounded, rich-green foliage provides added intrigue during active growth. Excellent as a cutback shrub, especially when combined with contrasting stem colors in the garden. A worthy option for floral arrangements as the dried stems maintain their unique color. - 6-10' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #7 \$79.99

Salix x leucopithecia Hybrid Willow - Zone 4 - Full Sun - Garden Hybrid

A hybrid between *Salix caprea* and *S. gracilistyla* first described in the 1950's. Though rare in cultivation, plants are primarily grown for their shrubby habit and late winter floral display. As with most willows, full sun conditions coupled with even soil moisture are prime considerations for garden performance. - 10-15' Tall and Wide

'Rabbit's Foot' - A fine willow boasting some of the largest and showiest silvery catkins of the genus. 'Rabbit's Foot' was discovered at a nursery in Ohio and introduced by *Salix* authority Dr. Kuzovkina. Plants offer excellent vigor, high quality cut stems and a dynamic garden presence when in full display in February and March. - 10-15' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Sambucus nigra Elderberry - Zone 5 - Full Sun - Europe, Northern Asia, Western Africa

A fast growing, versatile shrub that has been valued throughout the ages for a tremendous number of uses including dye making, insect repellent, ointments, wines, jellies and musical instruments among other things. Today, elderberries make great ornamentals and are valued for their attractive white flowers and clusters of purple-black berries. Recent breeding work has added a host of foliage and color patterns to the mix. We think everyone should add one to their gardens and besides, if you ever need to get rid of those pesky bugs or soften your skin, you know which bush to call on. - 8-12' Tall and Wide

'Eva' - An exciting form showcasing sexy, midnight-purple, deeply divided foliage. The lacy leaves are complemented by 6" clusters of pale pink flowers in summer and crops of edible berries in autumn. Plants have caused quite a stir and have been promoted as a substitute for Japanese maples in the north. - 6-8' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'SNR1292' - Laced Up® - PP 29051 - An exciting new elderberry that offers a similar habit to 'Eiffel 1' but is dressed in elegant, heavily dissected, feathery black leaves! Blossoms like delicate pink parasols add additional appeal in late spring. The prim, upright habit combined with the dainty leaves and flowers definitely make this cultivar the fine lady of the garden. - 8' Tall, 4' Wide - #3 \$49.99 • #5 \$59.99 (July)

Sophora davidii Father David's Sophora - Zone 5 - Full Sun - China

A charming, semi-dwarf shrub with deciduous, finely textured foliage. In late spring, plants are cloaked with masses of two-toned, pea-like, white and blue flowers born on 4-8", terminal racemes. Stunning and one of the best kept secrets of the shrub world! - 8-10' Tall and Wide

#2 \$39.99 • #3 \$59.99 • #5 \$89.99 (July)

Sorbaria sorbifolia Ural False Spirea - Zone 3 - Full Sun-Part Shade - Northern Asia

The ural false spirea is a relatively uncommon suckering deciduous shrub showcasing airy, Astilbe-like, conical clusters of white flowers held atop upright twigs in early summer. As the botanical name implies, plants also offer rich green, Sorbus-like (mountain ash), compound leaves that add textural contrast throughout the growing season. Plants are durable and reliable, thriving in difficult situations with few pest or disease ailments. Care should be taken when selecting sites as plants can spread vigorously by root sucker. Excellent for naturalizing or bank retention in difficult sites, also a worthwhile consideration as a low maintenance container subject. - 4' Tall, 10' Wide

'Sem' - PP 16336 - Wow, what a horrible name for a great plant! This elegant gem showcases compound leaves that unfurl in spring in shades of apricot, orange and pink. The color is quite uncommon in the world of shrubbery and persists for several weeks before maturing to a handsome, medium green. In July and August the display begins again as airy, cloud-like, creamy-white flowers strut their stuff atop the 4' upright stems. The show adds much color and grace to the garden at this difficult time of the year. Plants are easy to cultivate and tough as nails, developing into dense colonies in any average garden soil. - 4' Tall, 10' Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

Spiraea bullata Crispleaf Spirea - Zone 4 - Full Sun - China, Japan, Korea

A curious, diminutive shrub forming a 2' rounded form of small, crimped and crinkled leaves held tightly on stiff upright branches. Attractive rose-pink blossoms complement the foliage brilliantly in mid to late summer. - 2' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Spiraea japonica Japanese Spirea - Zone 4 - Full Sun - China, Japan, Korea

A rounded deciduous shrub growing 4-5' high and wide at maturity. The 1-3" leaves are dark green in color and provide a medium texture during the growing season. Showy, rose-pink flowers born in flat clusters are present during the summer months. The versatile plants are adaptable to any well-drained soil and prefer full sun or high canopy shade. In the garden they combine brilliantly with ornamental grasses, broadleaf evergreens and other plants with large leaves. The species itself is rarely cultivated, however, numerous superior cultivars have become available in recent years. - 4-5' Tall and Wide

'Alpina' - A charming selection that develops into a lush, spreading form 2' tall and several feet wide. A generous display of light pink blossoms complements the diminutive blue cast foliage during the summer months. Easily tucked into the rock garden or other tight garden corner. - 2' Tall, 3' Wide

#2 \$34.99 • #3 \$49.99 (July)

NEW 'Minspi' - Clusters of pale pink to fuchsia flowers are scattered with abandon across narrow, lightly serrated leaves each streaked with green, yellow, and cream. A whimsical, vibrant addition to most landscapes, but particularly those in need of color throughout the gardening season. - 3' Tall, 5' Wide - #2 \$34.99 (July)

'White Gold' - A spectacular spirea showcasing luminous yellow foliage throughout the growing season. In spring and summer the display intensifies with decorative white flowers atop the mounding forms. The flowers are a welcome complement to the foliage and don't clash like many of the older hot-pink flowering selections. - 3' Tall, 5' Wide - #2 \$34.99 (July) • #3 \$49.99

Spiraea thunbergii Thunberg Spirea - Zone 4 - Full Sun - Eastern China, Japan

An arching shrub that offers texturally pleasing, willow-like light green leaves complemented with an abundance of 1/4" airy single white blossoms. The easy to grow plants are well suited for mixed borders or mass plantings with the inherent durability needed for broad landscape use. - 3-5' Tall and Wide

'Ogon' - The brilliant, golden-yellow, finely-textured shrub makes a shimmering statement throughout the growing season. Abundant clusters of white flowers add to the display in early spring. Overall, a top-notch, easy-going garden plant that is always popular among our customers. - 3-5' Tall and Wide - #3 \$49.99

Spiraea x vanhouttei Vanhoutte Spirea - Zone 4 - Full Sun - Garden Hybrid

A large graceful shrub developing an elegant fountain-like habit of arching stems and greenery. The greenish-blue leaves harmonize well with spring's antique white flowers. Plants are strong growing, durable and create an arresting show when in bloom. Ultimate size can approach 8' in height and width. Best in full sun in average garden soils. - 6-10' Tall and Wide

'Pink Ice' - A showy new cultivar with pink and cream variegated foliage. Masses of white flowers provide added interest in spring. Plants are slower growing than the species reaching 3-4' tall at maturity. - 3-4' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Stachyurus praecox Spiketail - Zone 6b - Full Sun-Part Shade - Japan, Himalayas

A beautiful yet misunderstood shrub that is unjustly rare in most gardening circles. The graceful plants celebrate the end of winter with an elegant display of narrow pendent racemes along bare stems. Each raceme is 2-6" in length and is comprised of cheery pale-yellow blossoms. Post bloom, unassuming deep green leaves dress the arching stems. Plants value acidic, evenly moist soils and should be sited in protected locations as untimely frosts can spoil the magical floral qualities. - 8-15' Tall and Wide

'Aurea Variegata' - A rare Stachyurus selection that makes itself known in early spring when ample pendent, pale yellow racemes dangle from the airy framework. For added value, 'Aurea Variegata' adds colorful rich green foliage heavily suffused with a patchwork of gold and cream. - 8-15' Tall and Wide #2 \$34.99 • #3 \$49.99 • #5 \$69.99 (July) • #7 \$99.99 (July)

Syringa meyeri Meyer Lilac - Zone 3 - Full Sun - China

Nearly everything about this Chinese native, from the masses of tiny violet-lavender flowers held in 4" inflorescences in spring to the refined branching, gives these shrubs the appearance of being delicate wallflowers. Happily, these plants are incredibly durable and will thrive in a wide variety of soils provided they have full sun and adequate drainage. The dense branching provides thicker leaf cover during the year and branching extends closer to the ground than on many other species of shrub Syringa, making them valuable as a hedging option. Thankfully plants are also one of the most powdery mildew resistant lilacs available which helps maintain an attractive presence throughout the gardening seasons. - 5-6' Tall and Wide

'Palibin' - A compact shrub lilac with thumb-sized, mildew resistant leaves that are a rich, deep-green throughout the growing season and turn red-dish-bronze in autumn. Fragrant, lavender-pink flowers open in early May from rich, reddish-purple buds. One of the most versatile lilacs available and an excellent choice for foundation plantings or for use in the mixed border. - 5-6' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Syringa pubescens ssp. patula Manchurian Lilac - Zone 4 - Full Sun - China, Korea

Syringa pubescens ssp. patula offers a more upright habit than most other shrub lilacs, all the better to display the fragrant whitish-purple flowers that adorn its crown each May. Plants are strong growers and show good resistance to powdery mildew. A fabulous option for borders, hedging, or use as a show stopping spring focal shrub! - 5-8' Tall and Wide

'Miss Kim' - An exceptional, low maintenance shrub lilac with sweetly fragrant, pale-purple flowers. The dark green leaves turn attractive bronze-red shades in autumn. A superior selection that lends itself well to smaller gardens or foundation plantings. - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Syringa villosa Villous Lilac - Zone 3 - Full Sun - China, Korea, Eastern Russia

The villous lilac is a large, variable shrub native to regions of Korea, eastern Russia and northern China. Plants are valuable in the garden for extending the lilac flowering season with their notably late bloom cycle. The simple leaves have impressed venation and are sizeable, adding textural contrast in the garden. - 8-10' Tall and Wide

'Aurea' - An upright-rounded cultivar of this uncommon species best grown for its bold textured 6-8" oval leaves that present themselves in spring in shades of chartreuse and yellow. The vivid texture and color add instant impact in sunny exposures and a unique foil for the dense pale pink flowers. Blossoms emerge several weeks later than other more commonly cultivated species and are held in upright 8" panicles. Plants are easy to grow showing some resistance to powdery mildew. They are wonderfully tolerant to a range of pH conditions provided they are sited in an open, sunny exposure. - 6-10' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

Syringa vulgaris Common Lilac - Zone 3 - Full Sun - Southeastern Europe

The "classic" lilac, held in the highest regard for hundreds of years. This indispensable deciduous shrub offers large panicles of sweetly fragrant flowers in colors from ivory-white to deep-pink to dark purple. Great for planting near the bedroom window where the fragrance will meet you on May mornings. - 8-15' Tall, 6' Wide

'Krasavitska Moskv' - Masses of fully double white flowers with pink-blushed buds and petals. An excellent Russian hybrid and one of our favorites! - 8-12' Tall, 6' Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

NEW 'Ludwig Spaeth' - A classic, time-honored cultivar with deep burgundy-purple blooms on long, narrow panicles. Blossoms emerge later in the spring than most cultivars of common lilac, extending the season of interest. Quintessential intoxicating fragrance and the observation that this selection does particularly well in colder gardens adds value. - 8-12' Tall, 6' Wide - #2 \$34.99 (July)

'Primrose' - Widely promoted as a "yellow" selection. Unfortunately, this is nothing more than an exaggeration as the true color is more of a cream or if we squint a cream-yellow. That said, the coloring is indeed unique and attractive. Certainly worthy of a spot in the lilac collection and especially attractive when grouped with contrasting colors. - 8-12' Tall, 6' Wide - #3 \$49.99 • #5 \$59.99 (July)

'Sensation' - A popular form with single purple florets each surrounded with a distinct white border. Beautiful and unique. - 8-12' Tall, 6' Wide #2 \$34.99 (July)

'Weston's Rainbow' - Each spring, 'Weston's Rainbow' awakens the garden with a riot of bright bronze, yellow and orange new growth that adds a vibrancy uncommon in the world of lilacs. Large panicles of pale blue flowers add additional wow factor in May. As spring begins to wane the leaves transition back to the familiar rich green tones associated with standard forms. The original plant was discovered as a chance seedling in the 1980's though plants have only recently made their way to market. Many thanks to plantsman R. Wayne Mezitt for sharing this treasure with us. - 8-12' Tall, 6' Wide #2 \$34.99 • #3 \$49.99 (July) • #5 \$59.99 • Assorted Specimens Individually Priced

Syringa x 'Purple Haze' Purple Haze Lilac - Zone 4 - Full Sun - Garden Hybrid

A 2006 introduction from longtime plant propagator Jack Alexander of Boston's renowned Arnold Arboretum. The fast growing plants develop a rounded habit of lush, deep green leaves. Pale purple flowers emerge early in the lilac season emitting a fine, sweet fragrance. As an added bonus, plants do not set seed and as a result develop spectacular floral displays year in and year out. - 5-8' Tall and Wide

#2 \$34.99 (July) • Assorted Specimens Individually Priced

Syringa x 'Red Pixie' Red Pixie Hybrid Lilac - Zone 3 - Full Sun - Garden Hybrid

An open pollinated seedling of Syringa julianae 'Hers' offering deep wine red blooms that lighten as they age. Plants assume a rounded habit reaching 6' tall in time. Small, thumb-sized leaves are similar to S. meyeri and remain free from fungal discoloration that is commonly associated with many lilac species. - 5-6' Tall and Wide - Assorted Specimens Individually Priced

Vaccinium angustifolium Lowbush Blueberry - Zone 2 - Full Sun-Part Shade - Eastern and Central North America

A low growing shrub native to acidic, infertile soils throughout northern New England and adjacent Canadian provinces. Plants are cherished for their crops of sweet blueberries which make excellent pies and jams. In the landscape, they always please with their long lived display of scarlet fall color. Plants are perfectly suited as a slow growing groundcover for naturalizing or attracting wildlife. - 1' Tall, 3' Wide - #1 \$24.99 • #2 \$34.99 (July)

Vaccinium corymbosum Highbush Blueberry - Zone 3 - Full Sun-Part Shade - Eastern North America

An outstanding, long lived native shrub found throughout eastern North America. Plants develop white to pink urn-shaped flowers in May, just as the leaves are unfolding. The flowers are followed by large crops of blueberries which make a great snack if you're lucky enough to beat the birds! In fall, dark green leaves turn to yellow, bronze, orange and red and often retain their coloration for several weeks. Our 75+ year old garden specimen always draws attention with its unique architectural form. One of our finest native shrubs! - 6-12' Tall and Wide - **Assorted Specimens Individually Priced**

'Chandler' - We love the biggest and boldest so 'Chandler' was a natural attraction. This fun selection holds the current title for the largest blueberry in the world! The sweet, flavorful fruit are produced during mid-season and are reported to be the size of cherries. Now realistically we're not certain if that's accurate but we're willing to find out! The plants can be expected to reach about 7-8' in height with a slightly spreading canopy. - 5-8' Tall and Wide
#2 \$34.99 • #3 \$49.99 (July)

'Earliblue' - A standard early season producer with good quality berries on an upright plant. - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

'Jersey' - A late season fruiter with large crops of medium-sized berries. - 5-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

'Sunshine Blue' - A compact, rounded blueberry that we've fallen in love with for the excellent blue cast foliage that adds wonderful value to this under-appreciated group. Pale-pink urn-shaped flowers make way for crops of blueberries in early summer. - 3-5' Tall and Wide
#2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

Viburnum acerifolium Mapleleaf Viburnum - Zone 3 - Full Sun-Part Shade - Eastern North America

One of our finest and most underutilized native viburnums. Develops into small colonies of coarsely branched upright twigs cloaked with three lobed, maple-like leaves. Flat clusters of delicate, creamy-white flowers dress the plants in late spring. Autumn brings crops of purple-black fruit and distinct pinkish-purple foliage colors. Once established, plants show drought tolerance and are tolerant of some shade. An excellent consideration for drier sites in the woodland. - 4-6' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

NEW 'Child of Nature' - A pastel pink flowering selection of this exceptional species that was discovered by the keen eyes of Andy Brand, our former Nursery Manager, who is now thriving as Director of Horticulture at Coastal Maine Botanical Garden. Plants are distinct when compared to the species showing the best floral color saturation in sunny exposures. New growth emerges blushed with maroon and the well-formed plants present nicely in containers and the garden alike. When cross pollinated by other individuals of the species the plants will be rewarded with a bounty of blue-black fruit in autumn followed by reliable burgundy-pink fall foliage tints. During his time at the nursery Andy taught us all to enjoy the beauty and splendor of our native plant communities and the amazing diversity that surrounds us. This fine selection stands as a testament to those lessons that touched many of us. - 4-6' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Viburnum bracteatum Bracted Viburnum - Zone 5 - Full Sun-Part Shade - Southeastern United States

An upright, medium-sized, deciduous viburnum closely allied to and often confused with its close cousin *Viburnum dentatum*. The deep green leaves offer a heavier, somewhat leathery substance when compared to the latter which adds some capacity to resist the viburnum leaf beetles browsing tendencies. In summer a show of 5", creamy-white, flat-topped blossoms draws much attention. In fall, crops of blue, single seeded fruit appeal to gardeners and birds alike. Plants are tolerant of varied light levels though present the best ornamental qualities in sunny positions. - 8-10' Tall and Wide

NEW 'Crimson Gem' - A 2022 jewel from the Arnold Arboretum's Arnold Selects introduction program! New growth emerges with a reddish hue in early spring before shifting to standard green leaves that contrast sprightly with the white flower clusters that begin to unfurl in May. Each inflorescence is crowned with a unique and distinctive single red floret in the middle of the cluster, a decidedly uncommon trait in the genus. After flowering is complete crops of glossy black fruit and bronze foliar tones complete the well-rounded show. - 8-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Viburnum carlesii Korean Spice Viburnum - Zone 5 - Full Sun-Part Shade - Korea

A classic, rounded, deciduous viburnum sporting pinkish-red snowball shaped flower clusters in spring. The prized blossoms emit a heavy, long admired fragrance that perfumes the garden throughout April's bloom time. Clean leaves are oval in shape and remain attractive through the season before taking on bronze hues in fall. The specific epithet *carlesii* honors William Richard Carles of the British consular service who embarked on plant collecting expeditions in Korea during the late 1800's. - 6-8' Tall and Wide

NEW 'Prairie Blues' - A fine recent introduction from Gary Ladman that offers foliage touched with an extra heavy dose of blue pubescence that stands out in the crowd. Excellent pink blushed flower buds are held in rounded clusters opening to reveal white, highly fragrant blossoms. Burgundy red autumn hues add value in September. - 6-8' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Viburnum dentatum Arrowwood Viburnum - Zone 3 - Full Sun-Part Shade - Eastern North America

An easy to grow, native shrub once used by Native Americans for arrow making. The glossy, dark green foliage makes a wonderful complement to the dark blue-black berries. Fall color can be an attractive yellow-red-burgundy. An excellent choice for massing, wildlife, or naturalizing. - 6-10' Tall and Wide

'Island Treasure' - A Broken Arrow Nursery introduction featuring foliage that is brightly streaked and splashed with irregular creamy-gold variegation. Typical white, flat-topped flower clusters in spring followed by crops of blue fruit in autumn. Plants are vigorous, performing best in a drought free area with some afternoon shade. Care should be taken to remove any green shoots that arise. - 8-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Viburnum dilatatum Linden Viburnum - Zone 5 - Full Sun - East Asia

A large rounded shrub developing masses of 3-5" flat-topped flower clusters in May and June. Flowers are followed by showy red fruit that remain effective late into the year. Makes a wonderful specimen shrub or addition to the shrub border. More than one clone is generally required for reliable fruit production. - 6-12' Tall and Wide

'Daruma' - "A fun and rarely encountered selection of linden viburnum that showcases cute deep green leaves that are less than a quarter the size of the straight species. Though still new to us, plants exhibit surprisingly vigorous growth adding about 6-8" each year. Small clusters of creamy white flowers add interest in late spring followed by crops of scarlet fruit in fall. Excellent for textural contrast in the mixed shrub border. - 6' Tall and Wide

#2 \$34.99 • #3 \$49.99 (July) • Assorted Specimens Individually Priced

'Henneke' - An excellent form of linden viburnum grown for its prolific display of creamy white flowers in May and large crops of glossy, scarlet-red fruit in autumn. Plants develop a round, mounding form and have been shown to be more cold hardy than many other cultivars. - 8-10' Tall and Wide

#2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July) • #7 \$89.99 (July) • Assorted Specimens Individually Priced

'Michael Dodge' - A compact cultivar with bright yellow fruit and good orange to red fall coloration. Named after our friend and respected horticulturist, Michael Dodge. - 8-10' Tall and Wide - #2 \$34.99 (July) • #7 \$89.99 • Assorted Specimens Individually Priced

Viburnum farreri Fragrant Viburnum - Zone 5 - Full Sun-Part Shade - Central China

A refined viburnum with upright branching and thick, heavily veined foliage. Leaves emerge bronze-green in spring and settle on deep green during the growing season before transitioning to burgundy in autumn. An attractive display of sweetly fragrant, pinkish-white flowers grace the stems in late winter and early spring near the time the hybrid Hamamelis are looking their best. Full sun or bright shade in average garden soil will develop the best garden specimens. - 6-10' Tall and Wide

'Nanum' - Good things come in small packages! Sprays of small, light pink, intensely fragrant flowers greet the spring before the leaves emerge. Though plants are often shy to fruit, the autumn leaf display of reddish-purple makes up for it, offering an impact that belies its tight, compact framework. - 3-4' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Viburnum lantana Wayfaringtree Viburnum - Zone 4 - Full Sun-Part Shade - Europe, Western Asia

A large multi-stemmed shrub with a somewhat coarse branch structure. The large ovate leaves are dark green, velvety and of heavy texture. In late May, plants are clothed with numerous 3-5" creamy-white odorless flower clusters. As the season progresses the flowers become 1/3" red-black fruits. Plants are versatile and can be used for hedges, screens, or in a mass planting. - 8-10' Tall and Wide

'Aureum' - An alluring selection with glowing, golden-yellow foliage throughout the growing season. Foliage is set off by cheery white flower clusters in May. Makes a unique contrast element in the garden. - 8-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Wavcrest' - A unique viburnum selection with unusual cream-yellow and gold-splashed foliage. The variegation pattern is somewhat variable from leaf to leaf. Typical creamy white floral display and productive red-black fruit display of the species. - 8-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

Viburnum macrocephalum Chinese Snowball Viburnum - Zone 6 - Full Sun-Part Shade - China

At first glance you might be forgiven for thinking this plant was a white blooming hydrangea with an identity crisis, given the billowing masses of large, 6", puffy round flower clusters that appear in spring. Clean green foliage transforms to intense reddish-purple fall color that bookends the other end of the growing season to provide nearly year-round appeal. Culturally, plants are a breeze showing good performance in most average garden soils with more sun than shade. Care should be taken to avoid positions that regularly experience late spring frosts as the quick to emerge flowers can be damaged. One of those plants that we're extremely happy to be able to share as it is unjustly rare in gardens. - 6-10' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

Viburnum nudum Smooth Witherod Viburnum - Zone 5 - Full Sun-Part Shade - Eastern North America

Smooth witherod develops into an attractive multi-stemmed shrub with lustrous dark green leaves that turn shades of red and purple in fall. Flowers are creamy-white and appear in June and July in large, flat-topped clusters. In fall the fruit transitions from green to pink to blue to black as they ripen. Truly a wonderful plant and deserving of much wider landscape use. More than one clone is generally required for reliable fruit production. - 6-12' Tall and Wide

'Bulk' - From Dutch nurseryman Mark Bulk comes this slightly compact cultivar of smooth witherod viburnum which tops out in the 6-8' range in gardens. The autumn fruit show is exceptional combining pinks, azure and greens as they mature. Memorable bronze and purple fall tones complete the package. Excellent as a cross-pollinator to promote fruit set on other cultivars of closely allied viburnum species. - 6-8' Tall and Wide

#2 \$34.99 • #3 \$49.99 (July) • #5 \$59.99 (July)

'Moonshine' - An attractive native shrub with the quality lacecap flowers in spring that measure up to the best the genus has to offer. Blooms are followed by an especially bountiful fruit set that ideally is enough for both you and the ravenous birds to enjoy! A good companion to other selections of smooth witherod as multiple selections promote the best fruiting bounty. - 6-12' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July) • Assorted Specimens Individually Priced

'Winterthur' - A tremendous introduction from Winterthur Gardens with large clusters of white flowers and a striking display of fruit that transition from green to pink to blue. Beautiful reddish-purple fall color adds interest. A wonderful garden gem! - 6-10' Tall and Wide

#2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

Viburnum opulus European Cranberry Viburnum - Zone 3 - Full Sun-Part Shade - Europe, Western Asia, Northern Africa

An undemanding shrub used extensively for screening and for mass plantings. Plants are punctuated with decorative, flat-topped, white flowers in early summer. This display is followed by crops of bright red fruit that ripen in autumn and persist through early winter. One of the easiest viburnums to grow and an excellent choice for residential landscapes. - 8-12' Tall and Wide

'Nanum' - An antique selection that originated in Europe in the mid 1800's. Though largely nonexistent in cultivation this old-timer deserves a fresh look.

The amazingly dense, well formed billowy plants support overlapping three lobed leaves that add a unique texture to the front of the border. Leaves emerge flushed with burgundy in spring and transition to fresh green for the remainder of the summer before picking up red and pink tones in autumn. Although shy to flower and fruit they certainly make a strong impression with form and functionality. - 3' Tall and Wide - #2 \$34.99 • #3 \$49.99

Viburnum plicatum Doublefile Viburnum - Zone 5 - Full Sun - China, Japan

An elegant, broad, rounded, deciduous viburnum with a distinct horizontal tiered branching pattern. In May and June, hundreds of white flower clusters accentuate the branches and create a striking display. As the season progresses plentiful crops of red-black fruit provide ornamental appeal and a welcome food supply for many bird species. Doublefile viburnum can be used in large groupings, for screening or in the shrub border. Additionally, it's a wonderful choice to break strong vertical lines in the landscape. - 8-12' Tall and Wide

'Popcorn' - A classic selection of doublefile viburnum that shows exceptional cold hardiness and a brilliant floral display. In June, a profusion of 3" rounded flower clusters, closely resembling round popcorn balls, line the branches! A choice option for those seeking vibrancy. - 8-12' Tall and Wide

#2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

var. tomentosum 'Copper Ridges' - An uncommon clone offering thick, neatly ruffled leaves that emerge in spring with a burnished copper overlay before slowly turning green as the heat of summer sets in. Familiar white lacecap blossoms add reliable color during late spring and early summer. As the cooler weather of September arrives the color returns to a fiery copper-red autumn tone. - 8-12' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

var. tomentosum 'Molly Schroeder' - Another pink-flowered Viburnum plicatum recently introduced from New Zealand. Flowers appear in spring and are reliably soft pink from season to season regardless of spring temperature progression. As an added bonus, plants consistently rebloom, providing added display in fall! - 8-12' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July) • #7 \$89.99 • Assorted Specimens Individually Priced

var. tomentosum 'Summer Snowflake' - A distinct, upright selection that is sure to turn heads as plants produce a continuous display of 4" lacecap flowers from May to September! Our beautiful garden specimen has grown 12' tall and only 5' wide in 12 years. - 12' Tall, 6' Wide

#2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July) • #7 \$89.99 (July) • Assorted Specimens Individually Priced

Viburnum sargentii Sargent Viburnum - Zone 4 - Full Sun - Northeast Asia

A vigorous Asian viburnum closely related to our native Viburnum trilobum. Develops into an upright mounded form with coarse branch structure. The three-lobed leaves emerge in spring with bronze-purple overtones and often take on respectable yellow to pink fall color. White lacecap flower clusters with purple stamens cover the plant in May and June followed by cranberry-sized, scarlet-red fruit in fall. - 10-20' Tall

'Onondaga' - A choice selection from the US National Arboretum with dark maroon new growth and large lacecap flowers. Each delicate inflorescence is composed of abundant maroon-purple fertile florets edged with several pure white sterile florets. - 8-12' Tall, 6' Wide - #2 \$34.99 • #3 \$49.99 (July)

Viburnum wrightii Wright Viburnum - Zone 5 - Full Sun - Japan

An underutilized and underappreciated viburnum that is begging for wider landscape consideration. Plants are superficially similar to Viburnum dilatatum yet offer larger, glossier leaves. Plants develop a fine, mounded form reaching 6-10' tall when mature. Creamy-white, rounded flower clusters appear in late spring followed by waxy scarlet fruit in autumn. Impressive red-toned autumn foliage provides the icing on the cake! - 6-10' Tall and Wide

'CA Hildebrandt' - A fantastic viburnum from the collection of top notch plantsman Charles Hildebrandt. This fine shrub charms with lacy cream-white flowers in spring set against a backdrop of impeccable rich green foliage. Crops of glossy scarlet fruit mingle with multicolored amber and maroon foliage tones in the autumn landscape. Excellent for smaller gardens where the compact plants are versatile for many sun-drenched applications. - 6-10' Tall and Wide - #2 \$34.99 (July) • Assorted Specimens Individually Priced

Viburnum x bodnantense Bodnant Viburnum - Zone 5 - Full Sun - Garden Hybrid

A hybrid viburnum initially bred at Bodnant Garden in the 1930's by combining the likes of Viburnum farreri with V. grandiflorum. Plants are most recognized for their highly fragrant shell pink blooms that emerge from dormancy in late winter or early spring in Connecticut. Bronze tinted emerging leaves settle on green tones during summer months before taking on burgundy accent in autumn. Pea-sized red fruit transition to black as a final act before winter sets in. - 8-10' Tall, 5-6' Wide

'Dawn' - Fragrant pink flowers with purple anthers are one of the first welcome hints that spring is rising, much like the first faint streaks of sunrise coloring the horizon. Bronze tinted new foliage mellows into deep green during the growing season before reprising its early zest as brilliant burgundy-red fall color. - 8' Tall, 5' Wide - #2 \$34.99 (July) • #3 \$49.99 (July)

Viburnum x burkwoodii Burkwood Viburnum - Zone 4 - Full Sun - Garden Hybrid

An excellent group of multi-stemmed shrubs resulting from crosses between *Viburnum carlesii* and *V. utile*. They display dark green leaves and clusters of pink to white flowers that vary from faintly to powerfully fragrant. All make valuable additions to shrub borders and versatile companion plants. - 8' Tall and Wide

'Mohawk' - An excellent viburnum offering brilliant dark red buds which open to reveal white flowers with an intoxicating spicy fragrance. The buds are present several weeks before the flowers open and dramatically extend the ornamental appeal. Certainly a valuable addition to any sunny shrub border. - 8' Tall and Wide - #2 \$34.99 (July) • #7 \$89.99 • Assorted Specimens Individually Priced

Viburnum x pragense Prague Viburnum - Zone 6 - Full Sun - Garden Hybrid

The prague viburnum is an upright, rounded shrub that resulted from a cross between *Viburnum rhytidophyllum* and *V. utile* done in Prague in the 1950's. Plants command attention with their handsome, lustrous, dark green leaves and pink-blushed flowers. Overall a striking plant deserving of greater use. In our climate, plants are best when sited in a location that is protected from desiccating winter winds. - 8' Tall and Wide

#2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July) • Assorted Specimens Individually Priced

Viburnum x rhytidophylloides Lantanaphyllum Viburnum - Zone 5 - Full Sun-Part Shade - Garden Hybrid

A large, robust viburnum long valued for its durability and yearlong ornamental qualities. The rounded shrubs sport heavy textured leathery leaves of the deepest green and often remain evergreen in zone 6 and warmer climates. It's common for foliage to showcase distinctive venation and offer up a thick layer of gray-brown fuzz beneath. Antique white flowers emerge in summer and are held in 3-4" flat topped, rounded structures. With proper pollination the fruit display can be remarkable starting red before shifting to deep blue and black. Plants are the result of a hybrid between *Viburnum lantana* and its close cousin *V. rhytidophyllum*. Excellent in the garden for foliage accent, screening and general interest that carries the garden through the year. - 8' Tall, 12' Wide

NEW 'Fenceline' - An incredible texture plant featuring heavily corduroyed, deeply jungle green leaves that take on plum tones as cold sets in. Prolific cream flowers emerge in late summer making way for crops of red fruit that shift to black before senescence. In southern gardens or more protected areas plants lean toward remaining evergreen. - 6-10' Tall and Wide - #2 \$34.99 • #3 \$49.99 (July)

Vitex agnus-castus Chaste Tree - Zone 6 - Full Sun - Southern Europe, Western Asia

A large, vigorous, multi-stemmed shrub displaying opposite, 5" palm-shaped leaves with a handsome gray-green coloration. Large, terminal, upturned racemes of purple-blue flowers decorate the plants in late summer and fall. In our region, plants are fully root hardy yet show varied degrees of stem dieback in winter. We find this to be a benefit as it keeps the plants rejuvenated and within bounds. Typical specimens in our region will reach 6-10' in height whereas plants grown in the south can obtain as much as 30' in height. All perform admirably in sunny exposures with soils on the dry side. Excellent for ocean side plantings and for adding late summer color and texture to the garden. - 10-20' Tall and Wide

'Abbeville Blue' - A fine cultivar introduced by Louisiana Nursery in the early 1990's. Plants develop deep blue flowers which stand in stark contrast to the large, silver cast leaves. Superb for late season color! - 8-12' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'Blushing Spires' - A strong growing shrub valued for late summer's bounty of terminal flower panicles. Unlike the straight species, 'Blushing Spires' sports charming blush pink flowers rather than the classic blue that is often tied to the group. The panicles are delightful against the backdrop of silver cast, palm-shaped leaves that emit a fragrance of eucalyptus when bruised. - 8-12' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

Vitex negundo Chinese Chaste Tree - Zone 6 - Full Sun - Eastern and Southeastern Asia, Madagascar, Southeast Africa

A fast growing, irregular large shrub or small tree boasting palm-shaped leaves that command attention, adding a bit of tropical texture to the garden. Plants are heavily decorated with prominent terminal panicles of lavender-blue blooms in summer. Valuable for pollinators, it is common to see abundant butterflies and bees sampling the nectar amongst the canopy. Plants are durable and easily cultivated in dry, infertile soils. - 10-20' Tall and Wide

'Heterophylla' - An especially cutleaf selection of the species with palmately compound leaves that are heavily dissected giving a presence not unlike that of a green cut-leaf Japanese maple. As with the straight species, plants sport pronounced lavender-blue blooms throughout summer. - 8-12' Tall and Wide #3 \$49.99 • #5 \$59.99 (July)

Weigela florida Weigela - Zone 5 - Full Sun - East Asia, Japan

An old fashioned, deciduous shrub frequently planted during the Victorian era. The coarsely branched, rounded plants display abundant, 1-2", funnel-shaped flowers in May and June in all colors from white to pink to purple. Plants are quite versatile and are suitable for use in many landscape situations. The market has exploded with new introductions in recent years and we are happy to offer several fine selections. All are easy to grow, even hard to kill, in full sun in decent garden soil. - 5' Tall, 7' Wide

'Alexandra' - A prized selection offering interest all season long. The vigorous plants have dramatic, burgundy-purple leaves and perfectly proportioned rose-pink flowers. Sure to become a welcome addition to any open garden corner or a colorful addition to the shrub border. - 5' Tall and Wide #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

'Caricature' - A funky weigela sure to give the plant geeks of the world another aesthetic cheap thrill! Plants draw attention with unusual cupped foliage that balloons outward along the midrib and curves in at leaf edge. As if this wasn't enough, the leaves are rich green in the interior and surrounded with a prominent cream-white margin. Bright pink, trumpet-shaped flowers in late spring complete the package. - 5' Tall, 7' Wide #2 \$34.99 • #3 \$49.99 • #5 \$59.99 (July)

'Dark Horse' - A durable, long lived cultivar that has been overshadowed by newer, more highly promoted cultivars. 'Dark Horse' offers a dense habit coupled with handsome deep purple leaves. The leaves retain their color nicely through the season and make a fine contrast to late spring's show of pale pink trumpet-shaped flowers. - 2' Tall, 3' Wide - #2 \$34.99 • #3 \$49.99

Weigela praecox Praecox Weigela - Zone 5 - Full Sun - Japan, Korea, Manchuria

An early blooming species of *Weigela* native to regions in Asia including Japan, Korea and Manchuria. Flowers develop earlier in the season than *W. florida* and range in color from pale cream-yellow to deep rose-red. Flower color typically changes with blossom age and as a result multiple flower colors can be represented on the same plant at the same time. As you might expect the rounded plants are quite adaptable to varied environments with optimum growth developing in well-drained, sunny locales. - 5' Tall, 7' Wide

'Variegata' - A fine weigela that is uncommon in the US yet deservedly popular in the UK and European nursery industry. The easy to grow plants sport a rounded framework of thin stems decorated with medium green foliage stenciled with a colorful white margin. Masses of trumpet-shaped flowers appear throughout spring and early summer in a range of colors from bright rose to softer pastel pink tones. Plants blend easily into mixed plantings adding interest throughout the growing season yet never dominating the show. - 5' Tall, 7' Wide - #2 \$34.99 • #3 \$49.99

Weigela subsessilis Weigela - Zone 5 - Full Sun - Korea

A Korean member of this well known genus introduced into North America in 1977 and noted for its especially early May bloom period. The shrubby, multi-stemmed plants have a framework and cultural requirements similar to *Weigela florida* and showcase abundant, trumpet-shaped flowers that emerge in clusters of 3-6. Initially flowers are pale greenish-yellow but evolve through shades of pink and pale lavender as they mature. At peak display, multiple colors can be present on plants at the same time. - 6-7' Tall and Wide

'Canary' - An eye-catching weigela selection from Dick Lighty, former director of the Mt. Cuba Center. Offers a dramatic display of tubular, clear-yellow flowers in spring. Certainly a beauty not to be ignored. - 6-7' Tall and Wide - #3 \$49.99 • #5 \$59.99 (July)

'Shine On' - A unique sport of 'Canary' that adds seasonal excitement to this underutilized species. 'Shine On' is noted for its spring growth that stands out in the garden with a prominent cream-yellow leaf margin set against a medium green interior. The variegation pattern is stable and sun tolerant, adding unique contrast to accompany the vibrant, clear-yellow floral display. The variegation pattern persists for much of spring but will fade to green as the heat of summer sets in. We love this species and wish more would consider it for landscape use, with 'Shine On' bringing new dimension to the virtues of this species. - 6-7' Tall and Wide - #2 \$34.99 (July) • #3 \$49.99 • #5 \$59.99 (July)

Xanthorhiza simplicissima Yellowroot - Zone 3 - Full Sun-Shade - Eastern North America

A handsome, deciduous native groundcover that forms solid mats of rich green foliage held along 2' stems. Develops showy, golden-orange fall color late in the year. A unique plant that grows amazingly well under the toughest of landscape environments. - Groundcover - #1 \$24.99 • #2 \$34.99 (July)
